

# Nursing Note Example

XX/XX/20XX

X:XXpm

The patient is a 64 year old female whose chief complaint is an exacerbation of chronic migraines. Patient reports an 8/10 pain level that decreases to 7/10 on the current prescription of 600mg of ibuprofen once a day. Patient states she feels nauseous, which is a common symptom of her migraine exacerbations. She describes the quality of migraine as a "stabbing, throbbing feeling." Patient states she struggles with bright lighting and loud sounds because they worsen her migraines. In these instances, she says her pain score rises to 9/10.

Patient is AAOx3. HR=95 bpm, RR=20 bpm, T=98.6, BP=130/90, PO2=98%. Bowel sounds present and bowel movements remain regular. No complaints of impaired vision nor memory. Patient states there are no life stressors adding to her current migraine exacerbation. Patient states her sleep schedule is normal.

Mayowa Okumba, APRN, ordered a basic metabolic panel (BMP) and an MRI scheduled for tomorrow. Patient is aware and consents to these procedures. Will continue to monitor vitals and for any other signs of discomfort.

Cherise McDonald, RN
