[Handbook on Constructing Composite Indicators: Methodology and User Guide](#) OECD, European Union, European Commission, Joint Research Centre, 2008-08-22. A guide for constructing and using composite indicators for policy makers, academics, the media and other interested parties. In particular, this handbook is concerned with indicators which compare and rank country performance. [Public Investment Management Reference Guide](#) Jay-Hyung Kim, Jonas Arp Fallov, Simon Groom, 2020-03-03. The Public Investment Management PIM Reference Guide aims to convey country experiences and good international practices as a basis for decisions on how to address a country specific PIM reform agenda. The country references are drawn largely from previous diagnostics and technical assistance reports of the World Bank. The application of country diagnostics and assessments has revealed a need to address the following issues when undertaking a country reform in PIM: Clarification of the definition and scope of public investment and public investment management; Establishment of a sound legal, regulatory and institutional setting for PIM; making sure it is linked to the budget process; Allocation of roles and responsibilities for key players in PIM across government; Strengthening of guidance on project preappraisal, appraisal and selection prioritization procedures and deepening of project appraisal methodologies; Integration of strategic planning, project appraisal, selection and capital budgeting; Management of multiyear capital budget allocations and commitments; Efforts to address effective implementation, procurement and monitoring of projects; Strengthening of asset management and ex post evaluation; Integration of PIM and public private partnership PPP in a unified framework; Rationalization and prioritization of the existing PIM project portfolio; Development of a PIM database and information technology in the form of a PIM information system. The PIM Reference Guide does not seek to provide definitive answers or standard guidance for the common PIM issues facing countries. Nor does it seek to provide a detailed template for replication across countries; this would be impossible given the diversity of country situations. Instead, each chapter begins with an overview of the specific reform issue, lists approaches and experiences from different countries and summarizes the references and good practices to be considered in designing country specific reform actions.
