OBJECT LESSONS CHARLES C. RYRIE, 1999 **Object Lessons** Charles C. Ryrie, 1991-11-09 What good is a broken fingernail What can you do with a frying pan a hammer and an egg How is a balloon different from a brick The world around us is full of items useful for interesting and meaningful object lessons Dr Ryrie uses pencils light bulbs sunglasses and even the air around us to illustrate truths about salvation and the Christian life All 100 objects are simple and easy to find and the lessons can be used for any group of any age Children and adults alike will enjoy learning more when you present these fascinating illustrations **Museum Object Lessons for the Digital Age** Haidy Geismar, 2018-05-14 Museum Object Lessons for the Digital Age explores the nature of digital objects in museums asking us to question our assumptions about the material social and political foundations of digital practices Through four wide ranging chapters each focused on a single object a box pen effigy and cloak this short accessible book explores the legacies of earlier museum practices of collection older forms of media from dioramas to photography and theories of how knowledge is produced in museums on a wide range of digital projects Swooping from Ethnographic to Decorative Arts Collections from the Google Art Project to bespoke digital experiments Haidy Geismar explores the object lessons contained in digital form and asks what they can tell us about both the past and the future Drawing on the author's extensive experience working with collections across the world Geismar argues for an understanding of digital media as material rather than immaterial and advocates for a more nuanced ethnographic and historicised view of museum digitisation projects than those usually adopted in the celebratory accounts of new media in museums By locating the digital as part of a longer history of material engagements transformations and processes of translation this book broadens our understanding of the reality effects that digital technologies create and of how digital media can be mobilised in different parts of the world to very different effects **One Year to Better Preaching** Daniel Overdorf, 2013-09-06 One Year to Better Preaching provides preachers with fifty two hands on exercises that sharpen their homiletical skills The book is designed particularly for those who preach each week and have been perhaps for some time to help them get out of the rut of the routine and infuse their preaching with new sparks of creativity fresh approaches to sermon preparation and design and sharpened verbal and nonverbal communication skills Novice preachers also will find the exercises useful in developing their preaching abilities Each chapter includes instructions for an exercise tools and suggestions needed for the exercise comments from preachers who completed it and recommended resources for further study The exercises address eight categories of homiletics Prayer and Preaching Bible Interpretation Understanding Listeners Sermon Construction Illustrations and Applications Word Crafting The Preaching Event Sermon Evaluation Readers can complete the exercises in the order presented which address different categories week to week or they can sharpen their skills in a particular category over a period of weeks by using the chart provided They might also work through the exercises in collaboration with other preachers One Year to Better Preaching will leave a preacher reinvigorated

Make Sense of the Material World examines the ways material things objects and pictures were used to reason about issues
of morality race citizenship and capitalism as well as reality and representation in the nineteenth century United States For
modern scholars an object lesson is simply a timeworn metaphor used to describe any sort of reasoning from concrete to
abstract But in the 1860s object lessons were classroom exercises popular across the country Object lessons helped children
to learn about the world through their senses touching and seeing rather than memorizing and repeating leading to new
modes of classifying and comprehending material evidence drawn from the close study of objects pictures and even people In
this book Sarah Carter argues that object lessons taught Americans how to find and comprehend the information in things
from a type metal fragment to a whalebone sample Featuring over fifty images and a full color insert this book offers the
