Ocean An Illustrated Atlas:

Ocean Sylvia A. Earle, Linda K. Glover, 2009 Delve into this underwater world with ocean experts Sylvia A. Earle and Linda K. Glover who have devoted their lives to understanding the ocean and who share their insights in this atlas along with those of 27 other scientists and specialists. Other stunning data and imagery are revealed by the skills of expert photographers, cartographers and illustrators. Ocean An Illustrated Atlas distills decades of research, firsthand observations, scientific data and analyses and engages and informs all who may want to more deeply explore the nature of this blue planet. Accompanying the text are more than 100 maps, including 5 extraordinary new maps showing the nature of the seafloor of the major ocean basins in detail not published before. More than 170 photographs and three dozen illustrations provide new ways of looking at this amazing place with a perspective on the past, present and future of the ocean and on how it relates to human economies, health, security and the very existence of life. **BOOK JACKET**

Ocean an Illustrated Atlas Sylvia A. Earle, 2009 Maps of the World's Oceans Enrico Lavagno, Angelo Mojetta, 2019 This lavishly illustrated fact-filled atlas is a follow-up to Maps of the World and allows children to discover the fascinating and mysterious world below sea level with links to explore even further on computers and tablets. The dozens of colorful, detailed maps are filled with hundreds of illustrated icons highlighting creatures that inhabit the waters of the world, from deep ocean sharks to sea birds that rely on the water to survive. Also featured are vital vegetation, submerged shipwrecks and icons representing the myths and legends of the various peoples who supposedly lived by the seas. Along the surface, readers will explore ports, lighthouses, famous explorers and voyages, old navigation secrets and more. Flip the next page from any map and the corresponding icon key explains why these fish and animals, various organisms and more are so vital to the oceans and the seas and therefore the world. **The Illustrated Atlas of the Sea**, 2010 **Oceans** James Fargo Balliett, 2014-12-18 Covering 71 percent of the planet, these saline bodies of water provided the unique conditions necessary for the building blocks of life to form billions of years ago. This book explains how our oceans continue to support and influence life in important ways by providing the largest global source of protein in the form of fish populations, by creating and influencing weather systems and by absorbing waste streams such as airborne carbon. It is shown how oceans have an almost magnetic draw: almost half of the world's population lives within a few hours of an ocean. Although oceans are vast in size, exceeding 328 million cubic miles (1.37 billion cubic kilometers), they have been influenced by and have influenced humans in numerous ways. The book includes three detailed case studies. The first focuses on the most remote locations along the Mid-Atlantic Ridge where new ocean floor is being formed twenty thousand feet underwater. The second considers the Maldives, a string of islands in the Indian Ocean where increasing sea levels may force residents to abandon some communities by 2020. The third describes the North Sea at the edge of the Arctic Ocean where fishing stocks have been dangerously depleted as a result of multiple nations' unrelenting removal of the smallest and largest species. *Children's Illustrated Atlas* Andrew Brooks, 2016-08-01 A picture atlas that

takes young readers on a visual journey around the world from Spain and Portugal to China and Mongolia. Continents and countries are brought to life through stunning photography and eye-catching illustrations. Uncover incredible geographical features, wildlife, culture, history, and landmarks in unprecedented detail. This incredible and inspiring visual atlas takes you on a fact-filled continent-by-continent tour of the world. Throughout the pages of this adventure book, you'll discover more than 50 fascinating maps that are packed with fun facts and fresh images. Your child will learn all about the climate, populations, places, and industries of our world. Picture stories complement the maps from the giant river that flows through the Amazon forest to the frozen icebergs of the glacial Arctic.
