of committing elementary errors the papers presented in this book stress the need for flexibility and the concentration of forces in production economics in order to propose and implement approaches and solutions which can be adapted to continuously changing circumstances The state of the art of production economics is approaching a critical point in its evolution where it can be seen as part of a greater network involving people and locations throughout the world It is hoped that the readers of this volume will perceive production economics as an ongoing and open project as a methodological work in progress which requires the combined efforts of scientists and practitioners for coping with the many open questions that it poses **Japan-Manchoukuo Year Book ... ,1941** Includes sections Who's who and Business directory **Engineering and Mining Journal ,1898** *The Bedding Manufacturer ,1950* **Management Engineering, the Journal of Production ,1922** **Official Publications** National Association of Cost Accountants (U.S.),1924
