This study offers a new perspective on both observations. It blends theoretical inquiry with focused quantitative analysis and in depth investigation of seven countries Germany, Australia and New Zealand as well as Denmark, Finland, Norway and Sweden. The Politics of Income Taxation highlights the equity efficiency tradeoffs that structure the politics of income taxation and analyses how income taxes are embedded in broader tax systems. It explains the limited but enduring importance of political parties and democratic institutions. Finally the study paints a nuanced picture of the role of globalisation and thus sheds light on the pros and cons of tax coordination at European and international levels. **Top Tax**
