groundbreaking new handbook assembles in one place the existing research based knowledge in education finance and
policy thereby helping to define this evolving field of research and practice It provides a readily available resource for anyone
seriously involved in education finance and policy in the United States and around the world The Handbook traces the
evolution of the field from its initial focus on school inputs and the revenue sources used to finance these inputs to a focus on
educational outcomes and the larger policies used to achieve them It shows how the current decision making context in
school finance inevitably interacts with those of governance accountability equity privatization and other areas of education
policy Because a full understanding of the important contemporary issues requires input from a variety of perspectives the
