*Digital Destiny* Shawn DuBravac, 2015-01-12 Our world is about to change. In *Digital Destiny* How the New Age of Data Will Change the Way We Live, Work and Communicate. Shawn DuBravac chief economist and senior director of research at the Consumer Electronics Association CEA argues that the groundswell of digital ownership unfolding in our lives signals the beginning of a new era for humanity. Beyond just hardware acquisition the next decade will be defined by an all-digital lifestyle and the Internet of Everything where everything from the dishwasher to the wristwatch is not only online but acquiring, analyzing and utilizing the data that surrounds us. But what does this mean in practice? It means that some of mankind's most pressing problems such as hunger, disease and security will finally have a solution. It means that the rise of driverless cars could save thousands of American lives each year and perhaps hundreds of thousands more around the planet. It means a departure from millennia old practices such as the need for urban centers. It means that massive inefficiencies such as the supply chains in Africa allowing food to rot before it can be fed to the hungry can be overcome. It means that individuals will have more freedom in action, work, health and pursuits than ever before.
