Inclusive Systems for Migrants in Education Paul Downes, Jim Anderson, Alireza Behtoui, Lore Van Praag, 2024-03-12. This novel contribution examines the lived experiences of migrants in education in various international contexts, exploring common school system features that promote student inclusion and challenge their exclusion. With a range of international contributions and case studies from Canada, the US, Hong Kong, Japan, and Europe, the book offers critical, theoretically innovative understandings examining national policies and practices to develop reforms focusing on agency, heterogeneity, and systems of relational spaces for migrant youth. Chapters engage with discussions around differentiated needs of marginalised and vulnerable groups, as well as the importance of superdiversity in studying and developing inclusive systems for migrant youth in education. Offering unique insights, the book outlines a framework for the promotion of inclusive school systems that ultimately look to create quality learning environments that prevent discrimination and support students' holistic needs. It will be of great interest to researchers, academics, and postgraduate students in the fields of sociology of education, philosophy of education, psychology of education, teacher education, and social policy.
