Objectivity & Diversity Sandra Harding,2024-05-31 Worries about scientific objectivity seem never ending Social critics and philosophers of science have argued that invocations of objectivity are often little more than attempts to boost the status of a claim while calls for value neutrality may be used to suppress otherwise valid dissenting positions Objectivity is used sometimes to advance democratic agendas at other times to block them sometimes for increasing the growth of knowledge at others to resist it Sandra Harding is not ready to throw out objectivity quite yet For all of its problems she contends that objectivity is too powerful a concept simply to abandon In Objectivity and Diversity Harding calls for a science that is both more epistemically adequate and socially just a science that would ask How are the lives of the most economically and politically vulnerable groups affected by a particular piece of research Do they have a say in whether and how the research is done Should empirically reliable systems of indigenous knowledge count as real science Ultimately Harding argues for a shift from the ideal of a neutral disinterested science to one that prizes fairness and responsibility

**Unheard** Rageshri Dhairyawan, 2024-07-04 LONGLISTED FOR THE BREAD ROSES AWARD Have you ever felt unheard by your doctor? Been frustrated that they haven't understood your symptoms that they have neglected your concerns? When Dr. Rageshri Dhairyawan was admitted to hospital as a patient, she didn't receive the pain medication that she told them she needed despite her being a senior doctor. It was in that moment she understood that something was deeply wrong with our healthcare system. Doctors aren't listening, and it is making us ill. In *Unheard*, Dr. Dhairyawan takes us on a journey through history to show how not listening to patients has been ingrained in medicine from its inception. Western medicine has been built on the assumption that power should always lie with the doctor and that patients should be powerless to decisions made about their body if it is done to make them well. This, alongside the prejudices of society, has led to dramatic gaps in medical knowledge because for centuries people have not been heard. Dr. Dhairyawan offers a way to reshape our health system for a future where active and engaged listening is the new frontier in a timely, shocking, and engaging exposé of the medical world.
