The Business Model: How to Develop New Products, Create Market Value and Make the Competition Irrelevant Alexander Chernev, 2017-03-19

New product success is often attributed to intuition. Yet while some products born from intuition do make it big, many others crash and burn. The reason is that intuition is only one aspect of new product development. The other key ingredient of success is having a business model that outlines the ways in which new products will create market value. This book offers a systematic approach to identifying market opportunities and developing breakthrough business models. It outlines the key principles of business model generation, presents a value based framework for developing viable new offerings, and provides a set of practical tools for creating a meaningful value proposition that drives market success. The business model framework outlined in this book applies to a wide range of companies: startups and established enterprises, consumer packaged goods companies, and business-to-business enterprises, high tech and low tech ventures, online and brick-and-mortar entities, product manufacturers, and value added service providers, nonprofit organizations, and profit driven companies. Practical, actionable, and succinct, *The Business Model* is the essential reference and how-to guide for everyone seeking to achieve market success, from entrepreneurs to experienced managers, from senior executives to product designers, from those creating new market offerings to those improving on existing ones. This book is for those passionate about building great products that create market value and disrupt industries.

Leveraging Embedded Factors of Business Ecosystems. A Potential Driver for Business Model Innovations
,2021-05-20 Master s Thesis from the year 2020 in the subject Business economics Business Management Corporate Governance grade 1 00 Catholic University Eichst tt Ingolstadt language English abstract This thesis aims to identify business ecosystem s embedded factors as potential drivers for business model innovations and thus to contribute to an expansion of innovation opportunities In the context of the consideration of different ecosystem concepts first their characteristics and roles are presented to make a precise distinction related and traditional structures e g value network supply chain Innovation ecosystems business ecosystems and platform ecosystems are considered in this study and

empirically examined employing a multiple case study To ensure the value of the study only companies that have implemented a business model innovation within one of the defined ecosystems were included Innovations within the value chain of a single company can no longer fully satisfy new and dynamic customer needs It is therefore appropriate to intensify the network of relationships outside the company This is remedied by the value contribution resulting from the companies ecosystems which is higher than that of individual companies However in the ecosystem s environment the success of a company is strongly dependent on the success of its diverse and changing collaborations with other companies of different sizes and types Due to the embedding in different ecosystems the understanding of a company as an independent strategic actor is no longer appropriate in every case
