Leigh McKagen,Shelby E. Ward,2025-10-16 Future Spaces of Power explores political cultural and societal narratives of future space s on a global scale to complicate the cultural logic of systemic futures that exist outside the boundaries of dominant political imaginaries

Contributors critically engage with alternative visions found in literature film and other cultural artifacts that encourage us to either live with or escape from the systemic conditions of neoliberalism and late capitalism and consider what these alternative visions might do or fail to do in combating anti democratic futures environmental degradation and new forms of imperialism Through these analyses the volume collectively argues that anti postmodern and postmodern readings of future spaces overlook the everyday lived experiences of certain bodies including chronic health problems effects from systemic racism and other experiences of insecurity fear and death in the face of institutionalized violence by disregarding differential experiences of time within different spatial contexts Contributors suggest that critiques of narratives occurring within and about virtual and metaspaces artificial intelligence space exploration and even the colonization of outer space can provide critical insights concerning global futures and our perceptions of space and time especially as they inform how we should live in the present amid environmental destruction information capitalism neoliberalism and the remaining infrastructures of colonialism Ultimately this book interrogates how a variety of media shape and inform our understanding and assumptions about conceptualizations of future space s as it demonstrates how governmentality eliminates and regulates surplus bodies both overtly and covertly through the technological spatial discursive and temporal management of space *The Scottish Farm Servant* ,1924
