Large Language Models

LLMs are a form of generative AI based on Deep Learning that rely on very large textual datasets and are composed of hundreds of millions or even billions of parameters LLMs can be trained and then refined to perform several NLP tasks like generation of text summarization translation prediction and more Challenges and Applications of Generative Large Language Models assists readers in understanding LLMs their applications in various sectors challenges that need to be encountered while developing them open issues and ethical concerns LLMs are just one approach in the huge set of methodologies provided by AI The book describing strengths and weaknesses of such models enables researchers and software developers to decide whether an LLM is the right choice for the problem they are trying to solve AI is the new buzzword in particular Generative AI for human language LLMs As such an overwhelming amount of hype is obfuscating and giving a distorted view about AI in general and LLMs in particular Thus trying to provide an objective description of LLMs is useful to any person researcher professional student who is starting to work with human language The risk otherwise is to forget the whole set of methodologies developed by AI in the last decades sticking with only one model which although very powerful has known weaknesses and risks Given the high level of hype around such models Challenges and Applications of Generative Large Language Models LLMs enables readers to clarify and understand their scope and limitations Provides a clear and objective description of LLMs with their strengths and weaknesses Demonstrates current applications of LLMs along with strengths and known issues in each application Covers not only the advantages but also risks that LLMs bring today enabling readers to understand whether a particular LLM fits the problem at hand **The AI Factory: AI Capability Guide for SMEs** Kevin Shepherdson,Celine Chew,Joaquin Jay Gonzalez III, This book is about empowering the leaders of Small and Medium Enterprises SMEs and their teams to build their own AI Factory In a world where everyone has access to the same off the shelf AI tools the real advantage lies in creating intelligence that is uniquely yours rooted in your data your expertise and your customers While the primary focus is on SMEs the ideas and frameworks in this book also benefit gig workers consultants trainers solopreneurs and mid career professionals who may be navigating career uncertainty or seeking to upgrade their skills with generative AI For them building an AI Factory offers a way to differentiate stay relevant and deliver unique value to their clients or organizations Through the factory metaphor we show how to visualize and structure AI as part of your processes so it becomes a driver of competitiveness efficiency growth and innovation And here's the key you don't need to be a coder With the right mindset and practical toolkit any professional can move beyond simply consuming generic AI products to manufacturing intelligence that is tailored to their goals Now imagine a modern day manufacturing plant that ingests vast amounts of raw data to produce at scale intelligence and insights instead of tangible goods we can feel and touch This is the AI Factory Like many factories the AI Factory operates on two floors which are discussed further in this book
