Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing Roger Lee, 2022-11-18 This book presents scientific results of the 23rd ACIS International Summer Virtual Conference on Software Engineering Artificial Intelligence Networking and Parallel Distributed Computing SNPD2022 Summer which was held on July 4-6, 2022 at Kyoto City, Japan. The aim of this conference was to bring together researchers and scientists, businessmen and entrepreneurs, teachers, engineers, computer users and students to discuss the numerous fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Research results about all aspects, theory, applications and tools of computer and information science and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected the best papers from those papers accepted for presentation at the workshop. The papers were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. From this second round of review, 15 of the most promising papers are then published in this Springer SCI book and not the conference proceedings. We impatiently await the important contributions that we know these authors will bring to the field of computer and information science. **Quarterly Review**

**of Distance Education** Michael Simonson, Anymir Orellana, 2023-12-01 The Quarterly Review of Distance Education is a rigorously refereed journal publishing articles, research briefs, reviews and editorials dealing with the theories, research and practices of distance education. The Quarterly Review publishes articles that utilize various methodologies that permit generalizable results which help guide the practice of the field of distance education in the public and private sectors. The Quarterly Review publishes full-length manuscripts as well as research briefs, editorials, reviews of programs and scholarly works and columns. The Quarterly Review defines distance education as institutionally based formal education where the learning group is separated and where interactive technologies are used to unite the learning group. **Applications of**

**Immersive Technology in Architecture, Engineering and Construction** Abhinesh Prabhakaran, Abdul-Majeed Mahamadu, Colin A. Booth, Patrick Manu, 2025-06-27 This edited book addresses a gap in literature by advancing current understandings of the applications of immersive technology within the architecture, engineering and construction (AEC) sector. Globally, the architecture, engineering and construction (AEC) sector makes an enormous contribution to the socio-economic development of nations, which is primarily evidenced by its creation and provision of the built environment. The sector has, however, often been criticised for inefficiencies, waste and diverse forms of adverse impacts that are associated with the lifecycle of the provision of built assets: design, construction, operations and maintenance and end-of-life phases. Over the years, the inefficiencies, waste and adverse impacts have often been a catalyst for calls and initiatives to transform the AEC sector. The advent of the fourth industrial revolution, commonly referred to as Industry 4.0, which entails the automation and digitalisation of production, presents opportunities to leverage emerging technologies to improve the image and productivity

of the sector Prominent among the emerging technologies in the Industry 4.0 era is that of immersive technology which includes virtual reality mixed reality and augmented reality The capability of immersive technology to deliver beneficial impacts for multiple construction sector stakeholders throughout the construction lifecycle has been acknowledged within the industry and this continues to stimulate interest amongst practitioners policymakers and researchers Despite this phenomenon at present there is no dedicated compendium of research informed text that focusses on the multifaceted applications of immersive technology throughout the lifecycle of the provision of built assets right from concept design to end of life This book thus addresses this gap in literature by advancing current understanding of the applications of immersive technology within the AEC industry Readers will understand how the technologies are applied the resulting array of impacts including benefits drawbacks challenges and future directions for applications research and development
