Write simple expressions that record calculations with numbers, and interpret numerical expressions without evaluating them. For example, express the calculation "Add 8 and 7, then multiply by 2" as $2 \times (8 + 7)$. Recognize that $3 \times (18932 + 921)$ is three times as large as $18932 + 921$, without having to calculate the indicated sum or product.
Materials, Resources, Technology, Personnel	In order to do my guided activity, I will need the Active Board and my own laptop so that I can show my website on the Active Board. In order to do my independent student activity and to teach the technology standard that I want my students to learn, I need each of my students to have a computer. I am going to give them access to a document that has a BINGO game card on it, and I will need them each to print out the BINGO card so that they learn how to select a printer and print properly. For this, they will need internet access on their computers so that they can go to my website and download the BINGO card. I will also need a projector (the Active Board), a printer, and access to internet.
