Organic Spectroscopic Structure Determination A Problem Based Learning Approach:

Organic Spectroscopic Structure Determination Douglass F. Taber, 2007 Organic Spectroscopic Structure Determination is a sophomore level book with emphasis on structure problem solving It consists of four sections that attempt to engage the imagination of the student Taber has arranged the material in such a way that the students can work the problems and learn the procedures on their own minimizing the time taken in lecture The first section contains three chapters of instruction on the methods of organic spectroscopy The second contains fifty problems with just data sets of spectroscopic data The third section is comprised of fifty problems that show starting materials and reaction conditions with spectroscopic data for the product The final section includes tables of spectroscopic data

D. Field,S. Sternhell,J. R. Kalman,2012-12-27 The derivation of structural information from spectroscopic data is now an integral part of organic chemistry courses at all Universities A critical part of any such course is a suitable set of problems to develop the student's understanding of how structures are determined from spectra Organic Structures from Spectra Fifth Edition is a carefully chosen set of more than 280 structural problems employing the major modern spectroscopic techniques a selection of 27 problems using 2D NMR spectroscopy more than 20 problems specifically dealing with the interpretation of spin spin coupling in proton NMR spectra and 8 problems based on the quantitative analysis of mixtures using proton and carbon NMR spectroscopy All of the problems are graded to develop and consolidate the student's understanding of organic spectroscopy The accompanying text is descriptive and only explains the underlying theory at a level which is sufficient to tackle the problems The text includes condensed tables of characteristic spectral properties covering the frequently encountered functional groups The examples themselves have been selected to include all important common structural features found in organic compounds and to

emphasise connectivity arguments Many of the compounds were synthesised specifically for this purpose There are many more easy problems to build confidence and demonstrate basic principles than in other collections The fifth edition of this popular textbook includes more than 250 new spectra and more than 25 completely new problems now incorporates an expanded suite of new problems dealing with the analysis of 2D NMR spectra COSY C H Correlation spectroscopy HMBC NOESY and TOCSY has been expanded and updated to reflect the new developments in NMR and to retire older techniques that are no longer in common use provides a set of problems dealing specifically with the quantitative analysis of mixtures using NMR spectroscopy features proton NMR spectra obtained at 200 400 and 600 MHz and ¹³C NMR spectra include DEPT experiments as well as proton coupled experiments contains 6 problems in the style of the experimental section of a research paper and two examples of fully worked solutions Organic Structures from Spectra Fifth Edition will prove invaluable for students of Chemistry Pharmacy and Biochemistry taking a first course in Organic Chemistry Contents Preface Introduction Ultraviolet Spectroscopy Infrared Spectroscopy Mass Spectrometry Nuclear Magnetic Resonance Spectroscopy 2DNMR Problems Index Reviews from earlier editions Your book is becoming one of the go to books for teaching structure determination here in the States Great work I would definitely state that this book is the most useful aid to basic organic spectroscopy teaching in existence and I would strongly recommend every instructor in this area to use it either as a source of examples or as a class textbook Magnetic Resonance in Chemistry Over the past year I have trained many students using problems in your book they initially find it as a task But after doing 3 4 problems with all their brains activities working out the rest of the problems become a mania They get addicted to the problem solving and every time they solve a problem by themselves their confident level also increases I am teaching the fundamentals of Molecular Spectroscopy and your books represent excellent sources of spectroscopic problems for students *Artificial Intelligence Abstracts* ,1986
