Robin Hood Math Noah Giansiracusa,2025-08-05 How the rich and powerful use math to exploit you and what you can do to beat them at their own game Everything we do today is recorded as data that s sold to the highest bidder Plugging our personal data into impersonal algorithms has made government agencies more efficient and tech companies more profitable But all this comes at a price It s easy to feel like an insignificant number in a world of number crunchers who care more about their bottom line than your humanity It s time to flip the equation turning math into an empowering tool for the rest of us Award winning mathematician Noah Giansiracusa explains how the tech giants and financial institutions use formulas to get ahead and how anyone can use these same formulas in their everyday life You ll learn how to handle risk rationally make better investments take control of your social media and reclaim agency over the decisions you make each day In a society that all too often takes from the poor and gives to the rich math can be a vital democratizing force Robin Hood Math helps you to think for yourself act in your own best interests and thrive

Atlas of Science Katy Börner,2010-09-17 Science maps that can help us understand and navigate the immense amount of results generated by today s science and technology Cartographic maps have guided our explorations for centuries allowing us to navigate the world Science maps have the potential to guide our search for knowledge in the same way allowing us to visualize scientific results Science maps help us navigate understand and communicate the dynamic and changing structure of science and technology help us make

sense of the avalanche of data generated by scientific research today *Atlas of Science* featuring more than thirty full page science maps fifty data charts a timeline of science mapping milestones and 500 color images serves as a sumptuous visual index to the evolution of modern science and as an introduction to the science of science charting the trajectory from scientific concept to published results *Atlas of Science* based on the popular exhibit *Places* a guide to a PhD thesis that resembles a subway map the structure of science as revealed in a map of citation relationships in papers published in 2002 a visual periodic table a history flow visualization of the Wikipedia article on abortion a globe showing the worldwide distribution of patents a forecast of earthquake risk hands on science maps for kids and many more Each entry includes the story behind the map and biographies of its makers Not even the most brilliant minds can keep up with today's deluge of scientific results Science maps show us the landscape of what we know [Robin Hood Maths](#) [Noah Giansiracusa](#),2025-08-07

Big companies are using maths to take from the poor and give to the rich Maths professor Noah Giansiracusa shows how you can beat the system using simple hacks anyone can learn See what the algorithms are trying to hide from you and even better take back your own decision making power Jordan Ellenberg author of *How Not to Be Wrong* In today's data driven world maths is a weapon wielded by banks insurance companies tech firms and government agencies These organizations use sophisticated algorithms to calculate odds make predictions uncover patterns manage risk and optimize actions And they treat you as another number to crunch along the way Robin Hood Maths explains the mathematical methods these companies and agencies use to manipulate and profit off of you It's easy to assume these algorithms are too complex to even understand let alone use for yourself But maths professor Noah Giansiracusa makes the compelling case that anyone can use these same methods without any special training He offers simple hacks and streamlined formulas for beating the number crunchers at their own game **MAKE BETTER INVESTMENTS TAKE CONTROL OF YOUR SOCIAL MEDIA HANDLE RISK RATIONALLY** With Professor Giansiracusa as your guide you'll learn how to reclaim agency over the decisions you make every day In a society designed to take from the poor and give to the rich maths has the potential to be a powerful democratizing force Robin Hood Maths gives you the tools you need to think for yourself act in your own best interest and thrive **[The Bookseller](#)** ,1885 Official organ of the book trade of the United Kingdom [Athenaeum](#) ,1892

[Bookseller and the Stationery Trades' Journal](#) ,1886 [Google and the Mission to Map Meaning and Make Money](#) [Bart Milner](#),2004 This book is the unfolding story of the new technology of Internet Search how Larry Page and Sergey Brin the founders of Google discovered a new way to index the Internet's network of networks by developing Search methods so powerful that they effectively created a free public and universal library out of billions of random documents It also tells how together with the help of a brilliant team built initially at Stanford University they then found a new way of making money through contextual advertising now worth e billion leaving potential competitors particularly Microsoft far behind It shows how Google's founders have also succeeded in insisting that integrity rather than profit remains at the heart of an enterprise

that they will continue to control despite the best efforts of Wall Street The second half of this book also seeks to explain the central problems of machine intelligence the difference between words and their meaning or syntax and semantics which had blocked this kind of IT development for half a century until Google s founders discovered that hypertext the unique feature of the Internet that links documents could be measured and mapped to sort millions of apparently similar pages for relevance and significance Google s pursuit of a hugely ambitious and optimistic American dream that leaves them globally admired and respected keeping their principles intact whilst also creating a fabulously wealthy company is a winning blend of luck jokes mathematical inspiration engineering perspiration deep technical knowledge of the Internet and they would have you believe thousands of highly trained pigeons The book is 288 pages long including a comprehensive index and 600 item bibliography covering virtually all aspects of Internet Search The print version of the book comes with a free online electronic version with hypertext links to related articles and books designed to make any aspect of the history of Internet search easy to find with a couple of mouse clicks The book s author Bart Milner is a trained technology journalist and editor who started using the Web in 1984 with a 300 baud acoustic coupler and then became a developer partly to try and solve the question of why computer logic has been unable to deal with meaning and association This background has given him an insight into the inspired but almost accidental way that Google s founders cracked the problem of finding a significant document from billions of unindexed and changing Web pages in a fraction of a second Anyone interested in the future of the Internet and Information Technology should enjoy this fast and fluid story of a company which has become a flagship business of the 21st century by not conceding any of its integrity and principles to the huge pressures of commercial profit whilst providing some of the most elegant and powerful engineering solutions ever seen on the Net
