Google Maps Review Store Hours:

Location Awareness in the Age of Google Maps Rebecca Noone, 2024-07-12 Location Awareness in the Age of Google Maps explores the mundane act of navigating cities in the age of digital mapping infrastructures. Noone follows the frictions routing through Google Maps categorising and classifying of spatial information. Complicating the assumption that digital maps distort a sense of direction, Noone argues that Google Maps location awareness does more than just organise and orient a representation of space; it also organises and orients imaginaries of publicness, self-sufficiency, legibility, and error. At the same time, Location Awareness in the Age of Google Maps helps to animate the ordinary ways people are challenging and refusing Google Maps' vision of the world. Drawing on an arts-based field study spanning the streets of London, New York, London, Toronto, and Amsterdam, Noone's encounters of asking for directions open up lines of inquiry and spatial scores that cut through Google's universal mapping project. Location Awareness in the Age of Google Maps will be essential reading for information studies and media studies scholars and students with an interest in embodied information practices, critical information studies, and critical data studies. The book will also appeal to an urban studies audience engaged in work on the digital city and the datafication of urban environments.

Customer Engagement Roderick J. Brodie, Linda D.

Hollebeek, Jodie Conduit, 2015-12-14 How customers and consumer behavior have been changing due to technology and other forces is of prime interest. This book addresses the central questions regarding new emerging consumer behavior: how does social media affect this behavior, how and at what points do emotions affect consumer decisions, and what triggers this? How should engagement be conceptualized, defined, and measured? How do social media and other marketing activities create engagement? The book draws on the rich, extensive knowledge of the authors who are pioneers in the field. The book's editors have identified the weakness in the current knowledge and aim to address this gap by touching on significant conceptual and empirical contributions to this emerging literature stream, providing readers with a comprehensive, contemporary perspective of customer engagement. The book also endeavors to develop a richer narrative around the notion of social media and customer engagement and the non-monetary notion of social media within new media-based social networks.
