## **Obfuscation Users Guide Privacy Protest:**

**Obfuscation** Finn Brunton, Helen Nissenbaum, 2015-09-11 How we can evade protest and sabotage today's pervasive digital surveillance by deploying more data not less and why we should. With Obfuscation Finn Brunton and Helen Nissenbaum mean to start a revolution. They are calling us not to the barricades but to our computers offering us ways to fight today's pervasive digital surveillance the collection of our data by governments, corporations, advertisers and hackers. To the toolkit of privacy protecting techniques and projects they propose adding obfuscation the deliberate use of ambiguous, confusing or misleading information to interfere with surveillance and data collection projects. Brunton and Nissenbaum provide tools and a rationale for evasion, noncompliance, refusal, even sabotage especially for average users those of us not in a position to opt out or exert control over data about ourselves. Obfuscation will teach users to push back software developers to keep their user data safe and policy makers to gather data without misusing it. Brunton and Nissenbaum present a guide to the forms and formats that obfuscation has taken and explain how to craft its implementation to suit the goal and the adversary. They describe a series of historical and contemporary examples including radar chaff deployed by World War II pilots, Twitter bots that hobbled the social media strategy of popular protest movements and software that can camouflage users' search queries and stymie online advertising. They go on to consider obfuscation in more general terms discussing why obfuscation is necessary, whether it is justified, how it works and how it can be integrated with other privacy practices and technologies.

**Establishing and Evaluating Digital Ethos and Online Credibility** Folk, Moe, Apostel, Shawn, 2016-11-09 With the wealth of information that you can find on the internet today it is easy to find answers and details quickly by entering a simple query into a search engine. While this easy access to information is convenient it is often difficult to separate fallacy from reality when dealing with digital sources. Establishing and Evaluating Digital Ethos and Online Credibility features strategies and insight on how to determine the reliability of internet sources. Highlighting case studies and best practices on establishing protocols when utilizing digital sources for research this publication is a critical reference source for academics, students, information literacy specialists, journalists, researchers, web designers and writing instructors.

**e-Citizens** Alfredo M. Ronchi, 2019-03-06 This book explores a society currently being transformed by the influence of advanced information technology and provides insights into the main technological and human issues and a holistic approach to inclusion, security, safety and last but not least, privacy and freedom of expression. Its main aim is to bridge the gap between technological solutions, their successful implementation and the fruitful utilization of the main set of e-Services offered by governments, private institutions and commercial companies. Today various parameters actively influence e-Services success or failure: cultural aspects, organisational issues, bureaucracy and workflow infrastructure and technology in general, user habits, literacy capacity or merely interaction design. The purpose of this book is to help in outlining and understanding a realistic scenario of what we can term e-Citizenship. It identifies today's citizen who is

surrounded by an abundance of digital services as an e Citizen and explores the transition from their traditional role and behaviour to new ones The respective chapters presented here will lay the foundation of the technological and social environment in which this societal transition takes place With its balanced humanistic and technological approach the book mainly targets public authorities decision makers stakeholders solution developers and graduate students

**Understanding Cybersecurity Law in Data Sovereignty and Digital Governance** Melissa Lukings,Arash Habibi Lashkari,2022-10-14 This book provides an overview of the topics of data sovereignty and governance with respect to data and online activities through a legal lens and from a cybersecurity perspective This first chapter explores the concepts of data ownerships and privacy with respect to digital media and content before defining the intersection of sovereignty in law with application to data and digital media content The authors delve into the issue of digital governance as well as theories and systems of governance on a state level national level and corporate organizational level Chapter three jumps into the complex area of jurisdictional conflict of laws and the related issues regarding digital activities in international law both public and private Additionally the book discusses the many technical complexities which underlay the evolution and creation of new law and governance strategies and structures This includes socio political legal and industrial technical complexities which can apply in these areas The fifth chapter is a comparative examination of the legal strategies currently being explored by a variety of nations The book concludes with a discussion about emerging topics which either influence or are influenced by data sovereignty and digital governance such as indigenous data sovereignty digital human rights and self determination artificial intelligence and global digital social responsibility Cumulatively this book provides the full spectrum of information from foundational principles underlining the described topics through to the larger more complex evolving issues which we can foresee ahead of us

**The Oxford Handbook of Media, Technology, and Organization Studies** Timon Beyes,Robin Holt,Claus Pias,2020 This Handbook explores the largely uncharted territory of media technology and organization studies and interrogates their foundational relations their forms and their consequences The chapters consider how specific mediating technological objects such as the Clock or the Smartphone help us to create organizational form
