By far the biggest change in Office 2007 is the new user interface. A user interface which is what you see on the screen when you are using software provides a way for you to interact with software and tell it what tasks you want to perform. With Office 2007 Microsoft has streamlined the user interface so that you can more quickly and easily locate program features and complete tasks. The most noticeable user interface change in Office 2007 is the replacement of the traditional menus and toolbars with the Ribbon which groups commands in a way that corresponds directly to the way people work. The KeyTips feature allows users to invoke commands with just a few simple steps. This Transition Guide to Microsoft Office 2007 is designed to introduce you to the new Office 2007 user interface components.
