## **Handbook of Pricing Research in Marketing**

Vithala R. Rao, 2009 Pricing is an essential aspect of the marketing mix for brands and products Further pricing research in marketing is interdisciplinary utilizing economic and psychological concepts with special emphasis on measurement and estimation This unique Handbook provides current knowledge of pricing in a single authoritative volume and brings together

new cutting edge research by established marketing scholars on a range of topics in the area. The environment in which pricing decisions and transactions are implemented has changed dramatically mainly due to the advent of the Internet and the practices of advance selling and yield management. Over the years marketing scholars have incorporated developments in game theory and microeconomics, behavioral decision theory, psychological and social dimensions and newer market mechanisms of auctions in their contributions to pricing research. These chapters specifically written for this Handbook cover these various developments and concepts as applied to tackling pricing problems. Academics and doctoral students in marketing and applied economics as well as pricing focused business practitioners and consultants will appreciate the state of the art research herein.

Bala Ratnam, National Productivity Council (India), 1985 Report on productivity policy objectives, instruments and performance in India since 1954 examines evolution of productivity trends at regional level and local level in various industrial sectors, discusses institutional framework, planning and administrative aspects, obstacles, economic implications and labour relations implications, partic. Collective agreement on productivity measurement, production standards, wage incentives, profit sharing and workers participation schemes. ILO mentioned Graphs, illustrations, organigram, statistical tables.

**Planning and Reporting in BI-supported Controlling** Dietmar Schön, 2023-07-24 Planning and reporting solutions in many companies still suffer from poor data quality and are insufficiently integrated and are often time and cost intensive. This practice oriented book shows step by step how things can be done differently. It systematically shows how modern planning and reporting systems in BI supported controlling can be set up with the use of data warehouse and big data technology and usefully supplemented with AI supported features. For the 4th edition the book has been comprehensively updated. The extensive controlling cockpit example has been expanded. It now contains suggestions for the areas of corporate management, operational and strategic controlling, sales, production, purchasing and project management. In addition the latest developments in BI supported controlling with the support of traditional and explorative BI are highlighted including data mining, predictive analytics, artificial intelligence, RPA, chatbots, data discovery, data visualization, app technology, self-service BI and cloud computing. Further innovations concern the topics of data quality and data modeling. The final chapter is Mobile BI which deals with the expansion of powerful mobile analysis and planning solutions with the help of tablets, mobile phones and other mobile devices.
