Harrison,2017-11-14 At a time when the news cycle turns on a tweet journalism gets confused with opinion and facts are
treated as negotiable information applying critical thinking skills to your social media consumption is more important than
ever Guy P Harrison an upbeat advocate of scientific literacy and positive skepticism demonstrates how critical thinking can
enhance the benefits of social media while giving users the skills to guard against its dangers Social media has more than
two billion users and continues to grow Its widespread appeal as a means of staying in touch with friends and keeping up
with daily news masks some serious pitfalls misinformation pseudoscience fraud propaganda and irrational beliefs for
example presented in an attractive easy to share form This book will teach you how to resist the psychological and behavioral
manipulation of social media and avoid the mistakes that millions have already made and now regret Harrison presents
scientific studies that show why your subconscious mind loves social media and how that can work against your ability to
critically evaluate information Among other things social media reinforces your biases clouds your judgment with images that
leave a false impression and fills your brain with anecdotes that become cheap substitutes for objective data The very nature
of the technology keeps you in a bubble by tracking your preferences it sends only filtered newsfeeds so that you rarely see
anything that might challenge your set notions Harrison explores the implications of having digital friends and the effects on
mood self esteem and the cultivation of friendship in the real world He discusses how social media affects attention spans
and the ability to consider issues in depth And he suggests ways to protect yourself against privacy invasion cyberstalking
biased misinformation catfishing trolls misuse of photos and the confusion over fake news versus credible journalism
