Generative AI in Neurodegenerative Disorders Anindya Nag, Md. Mehedi Hassan, Asif Karim, Kishor Kumar Reddy C, 2025-10-14 This book delves into the transformative power of AI in the realm of neurodegenerative diseases covering topics such as ALS Huntington's Parkinson's and Alzheimer's. Generative AI provides new opportunities for early diagnosis precise therapy and individualized rehabilitation which are crucial as these conditions remain major obstacles for healthcare providers and researchers. Researchers physicians AI developers and healthcare professionals will find this book an invaluable resource for understanding how AI is influencing the development of treatments for neurodegenerative diseases. It describes important obstacles and future directions while providing insights into the newest breakthroughs thus bridging the gap between technology and practical clinical applications. Anyone involved in neurodegenerative healthcare from scientists conducting AI driven medical research to physicians seeking to incorporate AI into patient care or AI professionals investigating new healthcare applications will find the information and insights they need in this comprehensive book. Predictive analytics biomarker identification and drug discovery are being transformed by AI driven models such as deep neural networks generative adversarial networks GANs and variational autoencoders VAEs. This book offers a comprehensive examination of these developments. Robots wearable sensors and cognitive therapy platforms are some of the AI enhanced rehabilitation tools covered as are AI integrated cutting edge technologies like fMRI and MRI gene editing methods like CRISPR and more. In addition to discussing recent technical developments this book takes a close look at the data privacy ethics and regulatory issues that arise when using AI to study neurodegenerative disorders. Issues like algorithmic bias model explainability and fair AI driven healthcare are thoroughly investigated in light of the growing usage of AI models in clinical decision making mental health applications and cognitive rehabilitation. [Navigating Innovations and Challenges in Travel Medicine and Digital Health](#) Agarwal, Saurabh, Lakshmi, D., Singh, Lalit, 2025-04-11 Traditionally travel medicine focuses on pre trip consultations vaccinations and managing existing health conditions during travel. However the healthcare landscape is undergoing a significant transformation with the rapid integration of digital health technologies. Telemedicine for example allows for real time consultations with healthcare providers over video calls saving time and providing much needed access to medical expertise in remote locations. Additionally AI powered applications can analyze travel itineraries and provide personalized health recommendations based on destination specific risks. This convergence between travel medicine and digital health presents exciting possibilities and new challenges. *Navigating Innovations and Challenges in Travel Medicine and Digital Health* explores critical issues at the crossroads of travel medicine and digital health. It emphasizes the importance of collaboration and cross sector partnerships to ensure successful integration and address the digital divide. Covering topics such as medical tourism chronic illnesses and wearable technologies this book is an excellent resource for healthcare practitioners travel experts technology developers professionals researchers scholars academicians and more.

The application of new technologies such as new vaccines, therapeutic cytokines and antibodies, and antiviral drugs in the prevention and treatment of animal infectious diseases Guoxin Li,Lingxue Yu ,Jin Cui,2025-12-05 The outbreak of the epidemic has continuously refreshed human understanding of various pathogens and the pandemic of infectious diseases has caused more serious damage to human public health and socio economic development Up to now there is no specific antiviral drug for most viral infections and vaccination is the excellent weapon to effectively control epidemics and even eliminate infectious diseases However due to the strong mutation ability of viruses especially RNA viruses and the insufficient research on the pathogenic mechanism and immune mechanism of viral infections the application of traditional vaccine technology may not be effective in dealing with new pathogens with no characteristics In addition traditional vaccines also have disadvantages such as high preparation costs long research and development cycles and may not induce protective responses Based on the above facts establishing a new vaccine technology and a universal vaccine technology platform that can quickly develop and produce a large number of affordable vaccines has become an urgent research topic to be solved In recent years with the continuous development of science and technology various new technologies have developed rapidly This Research Topic will focus on the widespread application of new technologies such as targeted attenuated vaccine technology genetic engineering vaccines peptide antigen vaccines viral vector vaccines nucleic acid vaccine technology new adjuvant technologies the development of therapeutic cytokines and antibodies as well as antiviral drugs providing new hope and choices for the prevention and treatment of various animal diseases We welcome you to provide relevant research articles comments and original research
