Education and Development The University of Manchester UK **Wasted Education** John D. Skrentny,2023-11-17

We are living in an era of veritable STEM obsession Not only do tech companies dominate our cultural imagination of American enterprise and financial growth we urgently need science based solutions to impending crises As a society we have poured enormous resources into cultivating young minds for STEM careers The US sponsors 209 distinct STEM education programs in 13 different federal agencies at a cost of more than 3 billion This spending is on top of countless initiatives from philanthropic foundations and corporate giving And yet we are facing a STEM worker crisis In this project sociologist John D Skrentny asks if we're investing so much in STEM education why are as many as 75% of graduates with STEM degrees opting out of STEM careers The problem is not education he argues but the available jobs Skrentny aims to bring a reality check to America's growing dedication to STEM education Each chapter highlights an aspect of STEM work culture that drives away bright minds ranging from workplace culture and burn and churn management practices to lack of job security to the constant need for training on new innovations to the racism and sexism that exclude non white and Asian people and women Skrentny shows that if we have any hope of crafting science based solutions to many of our most urgent societal issues we have to change the way we're treating these workers on whom our future depends Care in the Iron Cage

Rowena Slope,2022-11-30 This book explores two public sector scandals in the UK drawing on Max Weber's thought on the iron cage to understand how these cases of patient neglect in NHS hospitals and failures by police and social workers to address the organised sexual exploitation of young girls occurred Through examination of the management failures and institutional vulnerabilities and with attention to the trends of bureaucratisation and rationalisation that characterised both scandals it reveals the explanatory power of Weber's thought developing a theoretical model that updates and extends Weber's work in light of the cases discussed The final chapter examines the response to the COVID 19 pandemic and highlights how the focus on a rational techno medical solution to the pandemic offered by the vaccines together with bureaucratic expansion has created an authoritarian and totalitarian society which represents the ultimate realisation of Weber's iron cage Showing that ordinary people including professionals are still trapped in the iron cage it will appeal to scholars of sociology and social theory as well as those providing training and working within the caring and service professions of policing social work and nursing **Quality and Safety in Radiation Oncology** Adam P. Industrial Development Report United Nations Publications, 2016-01-14. This report looks at how technology and innovation achieves inclusive and sustainable industrial development (ISID). Its main finding is that ISID is feasible and technology can simultaneously serve all three dimensions of sustainability including economic social and environmental. Rapid inclusive and sustainable industrialization can happen more frequently provided that policymakers firmly steer the industrialization process with opportune policies and avoid past mistakes. In some cases the spread of technology has not materialized in concrete growth opportunities because of the lack of technological capabilities. Innovation needs to be supported by interventions strengthening the process from invention to adoption as capabilities are developed and high tech manufacturing sectors are created seeing higher rates of sustainable growth.
