Parks in Peril Katrina Brandon,Kent Hubbard Redford,Steven E. Sanderson,1998 **Parks in Peril** Katrina Brandon,Kent H. Redford,Steven Sanderson,1998-07 Using the experience of the Parks in Peril program a wide ranging project instituted by The Nature Conservancy and its partner organizations in Latin America and the Caribbean to foster better park management this book presents a broad analysis of current trends in park management and the implications for biodiversity conservation It examines the context of current park management and challenges many commonly held views from social political and ecological perspectives The book argues that biodiversity conservation is inherently political sustainable use has limitations as a primary tool for biodiversity conservation effective park protection requires understanding the social context at varying scales of analysis actions to protect parks need a level of conceptual rigor that has been absent from recent programs built around slogans and stereotypesNine case studies highlight the interaction of ecosystems local peoples and policy in park management and describe the context of field based conservation from the perspective of those actually implementing the programs Parks in Peril builds from the case studies and specific park level concerns to a synthesis of findings from the sites The editors draw on the case studies to challenge popular conceptions about parks and describe future directions that can ensure long term biodiversity conservation Throughout contributors argue that protected areas are extremely important for the protection of biodiversity yet such areas cannot be expected to serve as the sole means of biodiversity conservation Requiring them to carry the entire burden of conservation is a recipe for ecological and social disaster **Conservation** Monique Borgerhoff Mulder,Peter Coppolillo,2005 Publisher Description

Transforming Parks and Protected Areas Kevin S. Hanna,Douglas A. Clark,D. Scott Slocombe,2007-10-18 A rare collection of articles that fuses academic theory critique of practice and practical knowledge Transforming Parks and Protected Areas analyzes and critiques the emerging issues in the design and operation of parks and protected areas

Managing Protected Areas Michael Lockwood,Graeme Worboys,Ashish Kothari,2012-05-04 This handbook produced by world renowned experts from the World Conservation Union IUCN spans the full terrain of protected area management and is the international benchmark for the field The book employs dozens of detailed international cases studies hundreds of concise topical snapshots maps tables illustrations and a colour plate section as well as evaluation tools checklists and numerous appendices to cover all aspects of park management from biodiversity to natural heritage to financial management The book establishes a conceptual underpinning for protected area management presents guiding principles for the 21st century reflects recent work on international best practice and provides an assessment of skills required by professionals As the most authoritative guide ever compiled to the principles and practice of protected area management this volume is essential for all professionals and students in all countries and contexts *Parks and People in Postcolonial Societies* M. Ramutsindela,2006-01-14 Against the background of colonial and postcolonial experiences this volume shows that power

relations and stereotypes embedded in the original Western idea of a national park are a continuing reality of contemporary national and transnational parks. The volume seeks to dispel the myth that colonial beliefs and practices in protected areas have ended with the introduction of new nature conservation policies and practices. It explores this continuity against the backdrop of the development of the national park idea in the West and its trajectories in colonial and postcolonial societies, particularly southern Africa. This volume analyses the dynamic relations between people and national parks and assesses these in southern Africa against broader experiences in postcolonial societies. It draws examples from a broad range of situations and places. It reinserts issues of prejudices into contemporary national park systems and accounts for continuities and interruptions in national parks' ideals in different contexts. Its interpretation of materiality transcends the North-South divide. This volume is accessible to readers from different academic backgrounds. It is of special interest to academics, policymakers and Non-Governmental Organisations. This book can also be used as prescribed or reference material in courses taught at university.

Recreation and Tourism, Università degli studi di Sassari. Dipartimento di botanica ed ecologia vegetale, 2004. Topics included in these papers include desertification, sustainable ecotourism, volunteer-based land management, biodiversity, urban open spaces, agricultural development, forest fires, and on-shore fishing in some of the protected areas of Europe, Africa, Asia, and North America.

Transboundary Protected Areas Urami Manage Goodale, 2003-05-30. Top researchers share their expertise on conservation and sustainability in areas that extend across national borders. This informative and insightful book examines strategies being used by governments and NGOs to protect wild areas that cross national borders and cultural, linguistic, and socioeconomic boundaries. In addition to presenting case studies from five continents, *Transboundary Protected Areas: The Viability of Regional Conservation Strategies* provides several theoretical overviews that suggest viable approaches to conserving biodiversity in these difficult-to-protect areas. From the editors: Historically, the borders of protected areas have been defined by convenient social, political, or proprietary boundaries rather than by ecological boundaries. Today, many scientists and practitioners are in agreement that the world's biodiversity and other natural resources can best be conserved on an ecosystem or regional scale, which may or may not be consistent with political boundaries. Efforts to protect land on an ecosystem scale have led to the creation of numerous transboundary protected areas, also referred to as international peace parks or transfrontier conservation areas. These areas, which often cross linguistic, socioeconomic, and cultural boundaries as well as national borders, represent regional conservation at its most complex. While many scientists and practitioners promote eco-regional approaches to conservation, many also advocate pursuing conservation goals on local or community scales. Conservationists therefore endeavor to achieve a seemingly incongruous mandate to pursue top-down regional goals using bottom-up local approaches. *Transboundary Protected Areas: The Viability of Regional Conservation Strategies*

Strategies addresses the vital questions associated with this mandate Is it reasonable and realistic to approach regional conservation this way What strategies have been employed to achieve these goals and how successful have they been Who benefits from transboundary conservation and what are the costs Reflecting the information delivered at the 2001 conference of the Yale chapter of the International Society of Tropical Foresters ISTF this book provides you with the best answers available at this time The contributors include social and natural scientists resource managers policymakers and community leaders Transboundary Protected Areas The Viability of Regional Conservation Strategies brings them together for an interdisciplinary exploration of these questions and other critical issues related to conservation in and around transboundary protected areas Specific cases that are thoughtfully examined in Transboundary Protected Areas The Viability of Regional Conservation Strategies include the public reaction to the Yellowstone to Yukon Y2Y Conservation Initiative the ways in which the establishment of southern Africa's existing and proposed Transfrontier Conservation Areas TFCAs can help conserve biodiversity aid socioeconomic development and promote international peace development and conservation efforts in the Maloti Drakensberg mountains of southern Africa which straddle the borderlands between South Africa and Lesotho the cultural aspects of protected area management in Venezuela and Guyana the impact of transfrontier collaboration as evidenced by the International Gorilla Conservation Programme IGCP in the Virunga Bwindi region of Africa Uganda Rwanda and the Democratic Republic of Congo how the Nepalese have addressed the problems of poaching commercial logging illegal harvesting and smuggling of forest products and illegal trade of wildlife and wildlife products in the eastern Himalayas by implementing a transboundary biodiversity conservation initiative Helpful maps tables and figures make geographical regions and conservation information easy to assimilate

Conservation for a New Generation Richard L. Knight,Courtney White,2009 Conservation for a New Generation highlights the dynamic state of how natural resources management is being practiced in the United States today as it transitions from top down programs and federal mandates to a largely bottom up approach that involves a broad range of stakeholders working together to achieve common goals The book considers the implications of those changes for future

conservation efforts and offers a conceptual blueprint for effective conservation that can guide students and practitioners both now and into the future **The Journal of Environment & Development** ,2006 *Peace Parks* Saleem Hassan Ali,2007 Peace Parks examines ways in which environmental cooperation in multijurisdictional conservation areas may help resolve political and territorial conflicts Its analysis and case studies of transboundary peace parks focus on how sharing of physical space and management responsibilities can build and sustain peace among countries It examines roles played by governments military civil society scientists and conservationists and their effects on both ecological management and potential for peace building in these areas After an historical and theoretical overview that explores economic political and social theories that support peace parks concept and discussion of bioregional management for science and economic development the book presents case studies of existing parks and proposals for future parks Publisher s description
