Whether you want to grow your career, build a side hustle, or simply save hours every day, this book is your all-in-one AI productivity handbook.

*Decoding Generative AI* Farabi Shayor, Kelina Lowther-Harris, Kirthana Srinivasan, Anoushka Samanta, 2024-04-16

The emergence of Generative AI has marked a significant turning point, heralding a new age of innovation and intellectual exploration. Much like a compelling narrative, this advancement in artificial intelligence has captivated the global community and ushered in an unprecedented surge of innovation. For many years, the subtle hum of AI has been interconnected into the fabric of our society. Devices such as Echo, Alexa, and Google Home, once considered avant-garde, are now seamlessly integrated into our homes and vehicles, becoming essential navigators in our daily journeys. However, this new phase of AI evolution is distinct. Capable of enhanced ability, these new generative AI systems could easily discern the intuitive needs of their end users. With a mere command or a simple image, generative AI systems can draft comprehensive reports, write legal documents, or produce intricate visual masterpieces. Their proficiency can also be extended to routine and mundane tasks, smoothly managing administrative duties, writing correspondences, and providing invaluable support in professional settings. Although these foundation models require a vast amount of training data and billions of parameters to be effective, the outcomes are equally remarkable. Technology companies and investors, recognising the potential, embarked on an investment spree, steering a new era for the development of specialised models such as Microsoft CoPilot, MidJourney, ChatGPT, and so on. As these technology companies continue to improve their language models, each version seems to be more refined than its predecessor. Foremost among these are the Large Language Models (LLMs), emblematic of this AI renaissance. Now, with voice-activated capabilities, generative AIs have become capable of much more in the relatively short span of their existence. With the integration of voice-activated features combined with their capabilities to speak like a human being, their potential continues to grow exponentially. They aren't labelled as chatbots anymore; these AI systems signify a technological paradigm shift, reshaping humanity's understanding of technology, automation, and creative expression. However, with such shift comes the imperative need for governance and control. The unchecked expansion of AI poses unmitigated challenges. In reality, these advanced AIs have the potential to be transformative and destructive parallelly. Thus, it is necessary to establish guidelines and oversight to

ensure the ethical deployment of such systems which this book focuses on As society stands at this transformative crossroads parallels are being drawn to the imaginative world of fiction The concept of Jarvis AI from the fictitious world appears provocatively close to becoming a reality The epoch of generative AI has truly dawned promising a future where technological prowess and human aspiration unite

**Path to Singularity** J. Craig Wheeler,2024-11-19

In a rapidly changing world are we on the brink of creating technology that outpaces our ability to control it Astrophysicist J Craig Wheeler former president of the American Astronomical Society takes a critical look at the technological advances shaping our future From artificial intelligence to genetic engineering Wheeler explores how these innovations are interconnected and the potential they hold for humanity's evolution He warns of a future where autonomous machines outsmart us and genetic modifications challenge our very essence With thought provoking insights into the ethical dilemmas we face Wheeler stresses the importance of staying informed and proactive Key Questions Raised by Wheeler Will there be jobs for those willing to work in a future dominated by automation How might social media companies manipulate our decisions potentially stripping us of free will Could AI influence or even dictate our voting behaviors If widespread mental connectivity becomes a reality could we see the emergence of a collective consciousness that erases individuality Have we exhausted Earth's resources and is population control necessary What implications arise if we solve aging How will society adapt to the challenges of perpetual youth What are the realistic prospects of migrating to space as Earth becomes increasingly inhospitable Our decisions today will determine if we control technology or if it controls us Through an engaging narrative Wheeler not only outlines the challenges but also offers practical advice on how we can retain control over our technological destiny Includes a Foreword by Neil DeGrasse Tyson

*The Routledge Handbook of Philosophy and Media Ethics* Carl Fox,Joe

Saunders,2023-11-13 The media informs entertains and connects us It is woven into the fabric of politics Its increasing immediacy has become an inescapable feature of almost everybody's life We are at the same time subject to the media and participants in it The ethical questions it raises have never been more urgent Trust is in short supply but we need to share information while dealing with problems like misinformation disinformation and echo chambers And what responsibilities fall on the state and on other actors such as artists advertisers and social media users as we reckon with endemic problems like racism sexism and classism The Routledge Handbook of Philosophy and Media Ethics is an outstanding survey and assessment of this vitally important field Comprising thirty chapters written by an international team of contributors the Handbook is divided into five parts Freedom of Speech Privacy and Censorship The News Media Broadening the Scope Giving Other Aspects of the Media their Due Justice Power and Representation Vice and Virtue Online The Routledge Handbook of Philosophy and Media Ethics is essential reading for students and researchers in philosophy media and communication studies politics and law as well as practising media professionals and journalists
