**Inevitable** Mike Colias,2025-02-04 A sweeping portrait of the EV transformation and what it means for all of us The question is no longer if electric vehicles will happen or even when they ll happen but how Veteran automotive reporter Mike Colias takes you inside the transformation in this thoroughly reported profile of the hard pivot in the car business a 2 trillion industry undergoing the biggest change in its 120 year history a change that is already sending ripples across the entire global economy Colias documents the inevitable shift from pistons to electrons from every angle taking you inside the boardrooms where executives battle over their EV strategies to take on Tesla and more recently emerging Chinese powerhouses such as BYD He brings you to family run car dealerships deciding if they ll sell EVs or sell their businesses He follows entrepreneurs along lonely stretches of road that will soon need charging stations He talks to power train engineers whose skills were once the beating heart of the automotive industry but who now find themselves being replaced by coders This is an epic exploration that stretches from Detroit to Japan to Germany to China and from factories in Normal Illinois and Haywood County Tennessee to a burgeoning mining operation along the shores of California s briny lithium rich Salton Sea Inevitable is a deeply enjoyable and smart book that uses masterful storytelling to

capture the expanse and dynamism of the transition to electric vehicles in profound detail bringing to life its seismic effects on everything and everyone Crafting and Executing Strategy Alex Janes,Ciara Sutton,2017-02-16 This new edition of Crafting and Executing Strategy continues to provide a valuable resource for European readers while embracing new and updated core concepts and key theories in strategy. Throughout the text you will find a range of examples that illustrate how strategy works in the real world and encourage the practical application of learning. Complementing the chapters is a section of new cases providing in-depth analysis of the challenges of strategic management at a range of companies. This edition includes a new 6Ds framework allowing readers to structure their approach to strategic management around the fundamental elements of the strategy process: Diagnosis, Direction, Decisions and Delivery, and the context within which that process is managed: Dynamism and Disorder. Opening cases that begin each chapter and feature real-life business scenarios from companies such as Tinder, Ikea and Victorinox introduce strategic concepts and theories. Illustration Capsules which have been updated to illustrate contemporary business concerns and demonstrate how companies have reacted strategically, increasing understanding of successful strategies. Companies featured include Burberry, TOMS, Aldi, Novo Nordisk and more. Key Debates that stimulate classroom discussion and encourage critical analysis. Emerging Themes that present contemporary strategic opportunities and issues such as ripple intelligence and technology and new organizational structures. A Different View encouraging readers to appreciate differing viewpoints on strategic concepts and theories. End of chapter cases that capture each chapter's main theories through engaging cases on companies such as Adidas and Nike, Lego and Uber. New recommended reading at the end of each chapter which help to further knowledge including classic texts and advanced reading and author notes providing context. Connect is McGraw Hill Education's learning and teaching environment that improves student performance and outcomes while promoting engagement and comprehension of content. New for this edition are interview style videos featuring author Alex Janes in discussion with business leaders exploring how organizational strategy has developed within companies as diverse as Jeep, Levi Strauss, Novo Nordisk and a prestigious oil and gas company. The videos are provided in full length or in segments with questions aimed at encouraging classroom discussion or self testing. This new edition is available with SmartBook, McGraw Hill Education's adaptive digital tool that tests students' knowledge of key concepts and pinpoints the topics on which they need to focus study time. Crafting and Executing Strategy is also available with both The Business Strategy Game and GLO BUS, the world's leading business strategy simulations. **Rare Earth Elements and China's Dominance of the Global Market** Anonym, 2013-08 Seminar paper from the year 2012 in the subject Business economics / Economic Policy grade: language: English abstract: Almost twenty years after Deng Xiaoping stated 'There is oil in the Middle East but there is rare earth in China, the country controls the REE global supply almost solely'. Recent Chinese policies of raising taxes and cutting export quotas combined with its temporary ban on REE exports led not only to steadily increasing prices. Most notably it created uncertainty among companies producing outside China whether

they will be able to get sufficient amounts of REE in the future and how much this is going to cost Because it will take several years until Western mining capacities meet Western companies demand some manufacturers in need of REE have already started to relocate their factories to China Beijing claims that their policies are dedicated to tackle environmental problems which have been caused by mining REE However taken into account that Beijing policies also require Chinese partners for foreign companies that operate within China Western companies that relocate their facilities may risk handing over knowledge to future competitors Aware of the consequences that Beijing's new fondness for environmental issues brings governments and companies especially in Japan the U.S. and Europe try to find ways to decrease their dependencies This report examines factors that led to China's dominance on the REE market today and presents some counteractions which governments and companies in Japan the U.S. and Europe have introduced to mitigate this situation The two principal findings of this report are first because Western mining companies will need time to meet their companies demand the current situation is going to sustain for at least a few more years to come and second although China runs the risk of selling off its REE resources abroad which it needs for its own economy at home it may benefit from the technology trans

**Learning-assisted Diagnosis and Control of Electric Distribution Network** Chaolong Zhang,Xiao Wang,Aihong Tang,Weihang Yan,David Gao,2025-08-08 The digital transformation of modern power systems enables more robust and transparent system planning and operation This process is highly reliant on big data which is widely available through energy generation to utilization The distribution networks are exposed to high challenges due to the massive integration of renewables and electric vehicles at low voltages but opportunities do exist due to the widely available infrastructure for data collection and smart control at the distribution level For example the phase measurement unit PMU for better system observation in the transmission system has been extended to the distribution network where standard protocols are available for high precision data transmission in a sub second timescale Artificial intelligence AI

technologies become the main enabler to utilize these data. This provides revolutionary solutions covering fault diagnosis control and almost all aspects of modern electric power systems. The values of AI in distribution networks are widely recognized especially for the increased complexity of distribution systems where active management and autonomous operation are urgently needed. The typical mechanism based modeling and model based control lack adaptability under an evolving environment e g network topology changes that are more frequent at the distribution level. However the existing AI technologies as well as the associated machine learning algorithms cannot be directly transplanted into the area of power systems. To fulfill the strict technical requirements in power systems for security generalization capability, interpretability out of sample performance, robustness and reliability are the main issues to be addressed before their massive deployment. Therefore this Research Topic aims to provide a contribution in line with this area of research i e innovative approaches and schemes for learning assisted diagnosis and control for the medium to low voltage distribution networks. Original work focusing on the applications of state of art AI technologies in the power and energy related fields are invited. Both high quality Original Research and Review Articles are welcome about the latest progress and potential research applications of the relevant areas with interests in modeling, control, monitoring and diagnosis of the distribution network using AI related techniques.
