**Top Tech Analysts** Mark Mahaney, 2021-11-09 Find the winners, avoid the losers and build a solid Tech portfolio for the long run with proven methods from legendary analyst Mark Mahaney. The Tech industry is the stock market's hottest, most profitable sector but it can be a roller coaster ride. Companies with great ideas can end up going nowhere and some that dominate today will be sold at fire sale prices in five years. Sure things can become sore things very rapidly. Nothing But Net provides the knowledge and insights you need to understand what's really hot to know what's not and to outperform other investors consistently and decisively. Famous for his smart, savvy and unique approach to Tech stock investing, Mark Mahaney provides his 10 proven rules for succeeding as a long term Tech stock investor, explaining everything he's learned during almost 25 years of analyzing internet stocks including: Why revenue growth and customer metrics not earnings are what matter most to Tech investors; How to invest not trade in the great growth opportunities that lie ahead; How to determine when high valuations are a warning sign and when they signal an opportunity; I've watched the rise of some of the leading companies of today: Facebook, Amazon, Netflix, Google and the fall of some of the leading companies of yesterday: Yahoo, eBay and AOL. Mahaney writes: Figuring out which companies really are going to be dominant franchises is an extremely hard thing to do. But those who accomplished this were arguably able to generate some of the best portfolio returns in the stock market over the past generation. Nothing But Net provides powerful advice for the next two decades: lessons you can start applying today and use for years to come.

### **Insights Into COVID-19 Crisis**

Zurina Kefeli, Nursilah Ahmad, Nor Haziah Hashim, 2021 *How Uber and Lyft Drivers Make More Money* Michael Mathiesen, 2018-12-30. This book is meant for all of the Uber and Lyft or any other Rideshare Drivers in the world about 5 million of us who know that they must replace this income AND SOON because Uber and Lyft are both going to begin trading their stock on the major exchanges this year called Going Public and therefore will have to show continually growing profits to the investor community and therefore cannot pay their drivers as generously as before. Drivers will also have to replace income lost because the entire fleet of Rideshare vehicles will be replaced by Driver Less or Autonomous Vehicles in two to three years from the publication date of this book. Uber and Lyft and all other Rideshare jobs are going to vanish in less than three years tops and in the meantime driver income will be dwindling in order to show constantly increasing profits to Wall Street. Visit [www.HowUberAndLyftDriversMakeMoreMoney.com](http://www.HowUberAndLyftDriversMakeMoreMoney.com) to receive updated information on this important topic especially if you are currently an Uber or Lyft Driver. One of the most disruptive of all inventions in this century has been the Rideshare and other mobility Apps. The projections for this industry is that it will top over 1.5 Trillion dollars by 2030 and become a major portion of the world economy. Don't get left behind in this giant tsunami wave of economic and job development. What's more important is how fast the new Gig Economy is changing so many lives and even the fabric of the American markets. Don't get left behind. We may be entering one of the most challenging epochs in history as we slowly cause more and more climate change and governments are helpless to do anything about it. This means the migration of billions of people all over the planet and this is why the estimates of the mobility app Industry is probably extremely under stated. It's this author's opinion that everything your job, your retirement, your health care, your jobs, your food and your safety even your home will become a mobile app commodity. There are currently around 10 million Uber and Lyft Drivers around the world and very quickly they will be replaced by robots. If you are an Uber and Lyft Driver you need to take action now at [www.HowUberAndLyftDriversMakeMoreMoney.com](http://www.HowUberAndLyftDriversMakeMoreMoney.com). *Perspectives on the Ridesourcing Revolution* Margo Dawes, 2016. Media coverage of ridesourcing services such as Uber and Lyft has described a rivalry between new technology and the established

taxi industry Individual users and non users of ridesourcing however may have more nuanced perspectives but policymakers have little guidance on how to best represent these interests This thesis uses a standardized questionnaire distributed across the United States by an online survey company to understand individual attitudes toward Uber Lyft and ridesourcing technology as a whole It asks respondents if they identify as users or non users of ridesourcing why or why not how they rank Uber and Lyft among their other travel modes their attitudes toward the companies and toward the technology in general on a Likert scale of 1 very negative to 5 very positive and their opinions on how their cities should respond among other questions 394 completed questionnaires from the most populous 15 metropolitan statistical areas in the U S reveal individuals use of and attitude toward ridesourcing technology along with variations across demographic groups cities and regions and primary travel mode The survey returned a response rate of 27% and the spatial distribution of responses was roughly proportional to the population of each metropolitan area The findings indicate that about 70% of respondents use some form of ridesourcing mostly for special purpose trips such as avoiding driving while intoxicated and getting to and from the airport The vocal minority who don t use Uber or Lyft for ethical reasons represent only a small subset of the sample about 6% but 1 in 5 respondents said the companies decision to treat drivers as independent contractors rather than employees made them want to use the services less There are relationships between transportation characteristics e g usage of Uber and Lyft needing to travel for work and having access to a car and user identification and attitude but demographics are the best predictor of user identification which in turn predicts attitude which predicts policy implications The study suggests potential for policymakers to leverage constituent perspectives to change aspects of ridesourcing that have low public approval
