Unschooling To University Judy L. Arnall, 2018-09-21 School is one option for education homeschooling is the second and unschooling is the third Many parents are frustrated by the school system perhaps because of bullying crowded classrooms and outdated dull online courses Disengaged learners that have no say in their coerced curriculum tend to act out tune out or drop out Education must change and unschooling is the fastest growing alternative method of learning Two decades ago students registered with their local school based on their house address Now with the internet students are borderless Learning can occur anywhere anytime anyway and from anyone including self taught Self directing their education unschoolers learn through Play Projects Reading Volunteering Video games Sports Mentorship Travel Life This book explores the path of 30 unschooled children who self directed all or part of their education and were accepted by universities colleges and other postsecondary schools Most have already graduated What children need most are close relationships parents teachers siblings relatives coaches and mentors within a wider community not just within an institutional school Educational content is everywhere Caring relationships are not Families that embrace unschooling do not have to choose between a quality education and a relaxed

connected family lifestyle They can have both

General Pedagogy Martha M. A. Zama, Margaret Nalova Endeley, 2023-02-24 General Pedagogy A Guide to Effective Teaching demystifies the scientific art of teaching by providing facts principles and concrete examples in real life situations such that neither the novice teacher who peruses it will stutter in front of students on the first day of school nor will the experienced teacher write and execute the same old lesson plans on that day The best teachers are those who show you where to look but don't tell you what to see is a popular quote attributed to Alexandra K Trenfor which aptly summarises the kind of teachers this book intends to produce when used as a teacher training resource Real teachers facilitate learning they do not simply tell learners the answers to their questions and concerns Accordingly the authors take the readers through well researched themes in the academic discipline of teaching wherein they present analyse and discuss pertinent issues Although they provide useful suggestions for teaching success the authors encourage teachers to interpret facts ideas and suggestions presented against the sociocultural contexts of their practice The materials are presented creatively while adding a personal touch intended to facilitate effective and efficient learning For coherence and better comprehension the book has been carefully crafted in eighteen chapters lodged in six parts The first part introduces the reader to the concepts of teaching and teaching effectiveness The theoretical underpinnings of these concepts are brought out in the second part which paves the way for the third part that describes generic teaching approaches strategies and methods Part four and five comprise essential teaching skills and teaching tools for the 21st century while part six wraps up with the transition from teacher training laboratories to classrooms in the real world The last two chapters intentionally prepare the teacher to overcome challenges of professional work in contemporary African classrooms
