Micromuseology Analysis Small Independent Museums:

Micromuseology Fiona Candlin, 2015-12-17 During the 1970s and 1980s thousands of micromuseums opened in the UK Europe and North America Small independent and dedicated to single subjects such as Romany life diesel engines or asparagus they have transformed the sector but have had little impact on the study of museums which has remained almost exclusively focused on major institutions In Micromuseology Fiona Candlin argues that researching the Bakelite Museum or the Museum of Witchcraft instead of the Louvre or the British Museum offers a radically new perspective to the dominant debates within museum studies *Introducing Museum Studies* Gordon Fyfe, 2025-06-17 *Introducing Museum Studies* is the first introductory textbook for museum studies Providing a wide ranging and original overview of museums from a historical and contemporary perspective it covers key topics such as the history of the museum the museum as a public space visitors and communities The book shows how museums far from being neutral collections exhibit objects which convey powerful symbolic meanings This cultural turn away from the object as a thing in itself has placed museums at the centre of debates about public culture citizenship inclusion and repatriation Museums are becoming increasingly reflexive given the awareness of the social and political role they serve and their ability to reflect the problems of our time Gordon Fyfe shows how and why this reflexivity creates a need for historical perspective on current practices on the one hand museums are enmeshed in a changing world and on the other hand they exhibit change At their best museums help us to see that everything is on the move and that change is the natural order of things Accessibly written this is the go to introduction for scholars and students of museum studies arts and cultural management and heritage studies *The Sustainable Museum* Christopher J. Garthe, 2022-11-30 *The Sustainable Museum* is the first book to outline a coherent strategy for the direction of museums as it relates to sustainability in the museum and heritage sector Arguing that museums must place sustainability at the centre of all their activities if they are to become key actors with a clear societal role Garthe considers the issues that museums will likely face as they take on their new roles Presenting case studies from a wide range of museums around the world the book considers different ways of implementing sustainability in different types and sizes of institutions Whilst the book clearly outlines the need for change it also provides guidance about how to change Garthe does this by considering specific concepts and approaches to sustainability in relation to the different aspects of museum operations The book includes a hands on manual for implementing sustainability management in a museum whilst also considering the challenges practitioners will encounter and considering what the future of the sustainable museum might look like *The Sustainable Museum* will be essential reading for museum and heritage professionals around the globe The book will also be of interest to academics and students engaged in the study of museums arts and cultural management business administration change management or sustainable development **Famines and the Making of Heritage** Marguérite Corporaal, Ingrid de Zwarte, 2024-06-05 *Famines and the Making of Heritage* is the first book to bring together groundbreaking research on the role of European

famines in the nineteenth and twentieth centuries in relation to heritage making museology commemoration education and monument creation Featuring contributions from famine experts across Europe and North America the volume adopts a pioneering transnational perspective and discusses issues such as contestable and repressed heritage materiality dark tourism education on famines oral history multidirectional memory and visceral empathy Questioning why educational curricula and practices in schools and on heritage sites are region or nation oriented or transnational chapters also consider whether they emphasise conflict or mutual understanding Contributions also consider how present issues of European concern such as globalisation commodification human rights poverty and migration intersect with the heritage and memory of modern European famines Lastly the book considers what role emigrant and diasporic communities within and outside Europe play in the development of famine heritage and educational practices and whether famine heritage is accessible to them Famines and the Making of Heritage provides a crucial resource for museum and heritage scholars students and professionals working on or with difficult or dark heritages as well as those interested in the study of famines and legacies of troubled pasts

The Changing Museum Clive Gray, 2022-11-30 Using the example of New Walk Museum Leicester and its collections the complexity multi causality and reasons for change in museums are examined and explained The 170 years history of New Walk provides an original basis and innovative approach to be adopted towards explaining museum change The book makes use of original interview and archive material to examine how and why social economic political and professional developments affected the work that was undertaken in New Walk The time span covered is much longer than is normal for a book on museum history and is longer than for almost all the national museums in the UK with this allowing for a nuanced understanding of the causes and consequences of museum change over time The problems and possibilities of undertaking museum history research are also discussed Detailed examination of the ways in which a variety of societal developments fed into museum change is a key feature of the book The book is aimed at all those with an interest in understanding how and why change affects museum practice and will be of interest to museum professionals academics and students in museum studies history politics and sociology as well to the general museum visitor who would like to discover more about the institutions that they visit

Negotiating Digital Heritage Infrastructures Quoc-Tan

Tran,2025-09-18 *Negotiating Digital Heritage Infrastructures* examines the infrastructural qualities of museum work that influence the ability of cultural institutions to support participatory and socially inclusive missions Drawing on data gathered in Scotland Sweden and Germany and taking an infrastructure studies approach the book focuses on the socio technical negotiations underpinning the everyday practices of museum staff The book examines the work that is done behind the scenes including the everyday tasks of collecting archiving displaying museum objects and retrieving information Tran argues that while the technical components of infrastructure are necessary for memory making and knowledge production it is the social part of museum infrastructure that enables more open and decentralised modes of memory making The book shows how these negotiations affect the ability of museum infrastructures to accommodate and support growth and development expanding access and establishing modes of connection to external partners and services It illuminates the less visible practices of museums which nevertheless directly affect their more public outward facing activities *Negotiating Digital Heritage Infrastructures* will be of interest to academics and students who are engaged in the study of museums and heritage It will be particularly useful to those with an interest in public participation social inclusion heritage management the digitisation of collections data aggregation and human centred design approaches

An Anthropological Approach Inge Daniels, 2019-02-07 Why do people go to exhibitions and what do they hope to gain from the experience What would happen if people were encouraged to move freely through exhibition spaces take photographs and be playful In this book Inge Daniels explores what might happen if people and objects were freed from the regulations currently associated with going to an exhibition Traditional understandings of exhibitions place the viewers in a one way communication form where the exhibition and those behind its creation inform their audiences However motivations behind exhibition going are multiple and complex and frequently the intentions of curators do not match the expectations of their visitors Based on an in depth ethnographic examination of the processes involved in the making and reception of one particular exhibition experiment as well as a study that follows freed objects into their new homes this publication not only sheds light on what exhibitions are but also what they could become in the future Featuring over 175 colour illustrations and using practical examples this is an important contribution for students and scholars of anthropology museum studies photography design and architecture

evolution transformation over time learning from the process rather than a big bang approach Internally a participative environment supports social interaction through active engagement with collections and content and Black includes an initial typology of participative exhibits both traditional and digital Externally the museum works in partnership with local communities and other agencies to make a real difference in response to societal challenges Black considers what this means for the management and structure of the museum emphasising that it is not possible to separate the development of a participative experience from the ways in which the museum is organised Museums and the Challenge of Change is highly practical and focused on initiatives that museums can implement swiftly and cheaply making a real impact on user engagement The book will thus be essential reading for museum practitioners and students of museum studies around the globe
