Reinventing the Middle Ages & the Renaissance William F. Gentrup, 1998 The fourteen essays presented in this volume contribute substantially to the study of the reinvention of the Middle Ages and the Renaissance They take an historicized approach to constructions of the past and most address the relatively new field of Medievalism All of them focus on how and why the present of any period uses the past to promote its own opinions beliefs doctrines or views In particular the volume demonstrates that reinventions of past eras or figures can be motivated by a nationalistic desire to create cultural roots to discover origins that justify a regime or group's self identity to appropriate a cultural icon or neglected author for a particular political agenda or to reflect on contemporary social issues via a remote time and place Reworkings or adaptations of earlier culture often tell us more about the age in which they were produced than the one revived or revisited This volume features five essays that treat medieval subjects four focus on Tudor and Stuart figures religion or politics and five concentrate on nineteenth century uses of medieval or early modern events literary conventions settings and themes

Manners, Customs, and Dress During the Middle Ages, and During the Renaissance Period P. L. Jacob, 1876 Art must be the faithful expression of a society since it represents it by its works as it has created them undeniable witnesses of its spirit and manners for future generations But it must be acknowledged that art is only the consequence of the ideas which it expresses it is the fruit of civilization not its origin To understand the Middle Ages and the Renaissance it is necessary to go back to the source of its art and to know the life of our fathers these are two inseparable things which entwine one another and become complete one by the other Preface

Moving Subjects Kathleen Ashley, Kathleen M. Ashley, Wim N. M. Hüskens, 2001 Procession arguably the most ubiquitous and versatile public performance mode until the seventeenth century has received little scholarly or theoretical attention Yet this form of social

behaviour has been so thoroughly naturalised in our accounts of western European history that it merited little comment as a cultural performance choice over many centuries until recently when a generation of cultural historians using explanatory models from anthropology called attention to the processional mode as a privileged vehicle for articulation in its society. Their analyses however tended to focus on the issue of whether processions produced social harmony or reinforced social distinctions potentially leading to conflict. While such questions are not ignored in this collection of essays its primary purpose is to reflect upon salient theatrical aspects of processions that may help us understand how in the performance of moving subjects they accomplished their often transformative cultural work **Men and Ideas**, 1959 The Classics in the Middle Ages State University of New York at Binghamton. Illustrated with over 400 images. What an ardent struggle during that long period and how full too of emotion is its picture. Society tends to reconstitute itself in every aspect. Originally published in 1876 **'Magic is No Magic'** Jozef T. Devreese, Guido Vanden Berghe, 2008-11-12 This book gives a comprehensive picture of the activities and the creative heritage of Simon Stevin who made outstanding contributions to various fields of science in particular physics and mathematics. Among the striking spectrum of his ingenious achievements it is worth emphasizing that Simon Stevin is rightly considered as the father of the system of decimal fractions as it is in use today. Stevin also urged the universal use of decimal fractions along with standardization in coinage, measures and weights. This was a most visionary proposal. Stevin was the first since Archimedes to make a significant new contribution to statics and hydrostatics. He truly was homo universalis. The impact of Stevin's work has been multilateral and worldwide including literature, William Shakespeare, science from Christian Huygens to Richard Feynman, politics Thomas Jefferson and many other fields. Thomas Jefferson together with Alexander Hamilton and Robert Morris advocated introducing the decimal monetary units in the USA with reference to the book *De Thiende* by S. Stevin and in particular to the English translation of

Paradigm Shifts During the Global Middle Ages and Renaissance Albrecht

Classen,2019 For a long time we have talked about the Middle Ages the Renaissance and other periods but at closer analysis all those terms prove to be constructed models to help us understand in rough terms profound changes that affected human conditions throughout time As the contributions to the present volume indicate paradigm shifts have occurred regularly and constituted some of the critical developments in human existence The notion of paradigm shift as first developed by Thomas Kuhn is here considerably expanded to address also literary religious scientific and cultural historical phenomena to deal with contrasting conceptions of various parts of the world China versus Europe conflicts between genders economic changes pertaining to women s roles social and political criticism models of how to explain our existence ideological positions and epistemological approaches The study of paradigm shifts makes it possible to grasp fundamental movements both horizontally the present world in global terms and vertically from the past to the present exposing thereby central forces leading to shifts in power structures and in the mental historical world views Focusing on paradigm shifts allows us to gain deep insight into conflicting discourses throughout time and to illuminate the struggle between dominant and competing models explaining or determining reality
