**Developmental Pathways Through Middle Childhood** Catherine R. Cooper, Cynthia T. Garcia Coll, W. Todd Bartko, Helen M. Davis, Celina Chatman, 2006-04-21 When can contexts and diversity be resources rather than risks for

children's developmental pathways. Scholars, policy makers, and practitioners increasingly realize that middle childhood matters as a time when children's pathways diverge as they meet new and overlapping contexts they must navigate on their way to adolescence and adulthood. This volume shines new light on this important transition by tracing how these contexts—cultural, economic, historical, political, and social—can support or undermine children's pathways and how children's own actions and the actions of those around them shape these pathways. With a focus on demographic changes taking place in the U.S., the volume also maps how experiences of diversity reflecting culture, ethnicity, gender, and social class matter for children's life contexts and options. Chapters by a team of social scientists in the MacArthur Foundation Research Network on Successful Pathways through Middle Childhood present the fruits of ten years of research on these issues with diverse cultural and ethnic communities across the U.S. These include a set of models and measures that trace how contexts and diversity evolve and interact over time with an epilogue that aligns and compares them. Surprising new findings—quantitative and qualitative—with cases showing how children and families shape and are affected by their individual, recreational, institutional, and cultural experiences and applications to policy and practice for diverse children and families. The importance of these new models, methods, findings, and applications is the topic of commentaries by distinguished scholars with both U.S. and international perspectives. The book is intended for researchers, practitioners, and policy makers as well as students in psychology, sociology, and education.

**Development During Middle Childhood** Panel to Review the Status of Basic Research on School-Age Children, Committee on Child Development Research and Public Policy, Commission on Behavioral and Social Sciences and Education, Division of Behavioral and Social Sciences and Education, 1984-01-15. For the first time a report focuses specifically on middle childhood, a discrete, pivotal period of development. In this review of research, experts examine the physical health and cognitive development of 6 to 12 year old children as well as their surroundings, school and home environment, ecocultural setting and family and peer relationships.

*Developmental Contexts in Middle Childhood*  
Aletha C. Huston, Marika N. Ripke, 2006. During middle childhood, the period between ages 5 and 12, children gain the basic tools, skills, and motivations to become productive members of their society. Failure to acquire these basic tools can lead to long term consequences for children's future education, work, and family life. In this book, the editors assemble contributions from 15 longitudinal studies representing diverse groups in the United States, Canada, New Zealand, and the United Kingdom to learn what developmental patterns and experiences in middle childhood contexts forecast the directions children take when they reach adolescence and adulthood. The editors conclude that, although lasting individual differences are evident by the end of the preschool years, a child's developmental path in middle childhood contributes significantly to the adolescent and adult that he or she becomes. Families, peers, and the broader social and economic environment all make a difference for young people's future education, work, and relationships. From publisher's description:

**Conflict Narratives in Middle Childhood** Marsha D. Walton, Alice J. Davidson, 2017-03-27. Conflict Narratives in Middle Childhood presents evidence from twenty years of research examining nearly 3 000 narratives from 1 600 children in eight settings in two countries about their own experiences with interpersonal conflict. Close readings combined with systematic analysis of dozens of features of the stories reveal that when children are invited to write or talk about their own conflicts they produce accounts that are often charming and sometimes heartbreakingly honest and that always bring to light their social, emotional and moral development. Children's personal stories about conflict reveal how they create and maintain friendships, how they understand and react to the social aggression that threatens those friendships and how they understand and cope with physical aggression ranging from the pushing and poking of peers to criminal violence in their neighborhoods or families. Sometimes children describe the efforts of adults to influence their conflicts; efforts they sometimes welcome and sometimes resist. Their stories show them taking on gender and other cultural commitments. We are not just watching children become more and more like us as they move through the elementary school years; we are watching them become the architects of a future we will only see to the extent that we understand their way of making sense.
