Migration, Urbanization, and Development Richard E. Bilsborrow,1998 Internal migration and urbanization are key dimensions of the process of socioeconomic development The unprecedented movement of peoples within the borders of their own countries is one of the greatest transformations witnessed in the 20th century Policy analysts especially those from developing countries where internal migration can be felt at first hand view migration as one of the most important factors affecting the course of development It is within this context that UNFPA convened the Symposium on Internal Migration and Urbanization in Developing Countries in January 1996 in preparation for the United Nations World Conference on Human Settlements in Istanbul in June 1996 The final results of the symposium are found in this book This volume provides a better understanding at global level of internal migration issues of concern to policy analysts

**Migration, Urbanization, and Development: New Directions and Issues** Richard E. Bilsborrow,2014-01-14 International migration and urbanization are key dimensions of the process of socioeconomic development The unprecedented movement of peoples within the borders of their own countries is undoubtedly one of the greatest transformations of humankind witnessed in the 20th century International migration while it has received perhaps less attention is an equally important process in many societies Policy analysts especially those from developing countries where the phenomenon of internal migration can be felt first hand view migration as among the most important factors affecting the course of development They consistently report that understanding the causes and effects of internal migration and urbanization is vital to putting in place policies to cope with the stresses and harness the potentials of migration in the most efficient way possible The world's population will surpass the 6 billion mark in 1998 In just a few years more another demographic landmark will be reached when over half of the world's population will be urban dwellers From that point on the world is forecast to become increasingly urban Latin America has already gone through this urban revolution and now has an urban population about three times larger than its rural population In the area of urbanization the greatest changes in the future will occur in Africa and Asia whose populations are still only about 35 percent urban

Migration, Urbanization, and Development Richard E. Bilsborrow,1998 The Dynamics of Migration, Health and Livelihoods Kubaje Adazu,Michael White,Sally Findley,Mr Mark Collinson,2012-11-28 Using INDEPTH's multi site network to provide new demographic insights into population variables this book provides a new perspective on migration health and livelihoods interaction over time The book starts with providing a conceptual and methodological framework to inform the epidemiological studies that are clustered into two themes showing the dynamics of migration with either household livelihoods or individual health outcomes The findings demonstrate the important cross national regularities in human migration The contributed chapters also exemplify the fact that the impacts of migration can be either positive or negative for sending and or receiving communities depending on the issues at hand and the type of migration under consideration

*International Handbook of Rural Demography* László J. Kulcsár,Katherine J. Curtis,2011-12-15 This is the third in an essential series of Springer handbooks that explore key aspects of the nexus between demography and social science With an inclusive international perspective and founded on the principles of social demography this handbook shows how the rural population which recently dropped below 50 per cent of the world total remains a vital segment of society living in proximity to much needed developmental and amenity resources The rich diversity of rural areas shapes the capacity of resident communities to address far reaching social environmental and economic challenges Some will survive become sustainable and even thrive while others will suffer rapid depopulation This handbook demonstrates how these future development trajectories will vary according to local characteristics including but not limited to population composition The growing complexity of rural society is in part a product of significant international variations in population trends making this comparative and comprehensive study of rural demography all the more relevant Collating the latest research on international rural demography the handbook will be an invaluable aid to policy makers as they try to understand how demographic dynamics depend on the economic social and environmental characteristics of rural areas It will also aid researchers assessing the unique factors at play in the rural context and endeavoring to produce meaningful results that will advance policy and scholarship Finally the handbook is an ideal text for graduate students in a spread of disciplines from sociology to international development
