Mind Fields Adolescent Consciousness In A Culture Of Distraction:

Mind Fields ,2005 **Mind Fields** Thomas J. Cottle,2001 In Mind Fields Thomas J Cottle argues that the period known as adolescence is essentially a social construct influenced greatly by popular culture To understand young people therefore is to recognize how the very consciousness of adolescents is shaped by a culture dominated by the entertainment industry and the power of television and the computer constantly urging them to turn away from the normal evolution of their personal and social lives In this fundamentally distracting environment young people explore their consciousness sharing it with others as well as form their sense of identity all the while having these most inner experiences affected as much by the culture as by their own temperaments and personalities It is the culture that determines the forms of recognition and independence as well as intimacy and attachment that adolescents must learn In the end the author argues for the value of self reflection as a critical ingredient of identity formation and a fundamental antidote to distracting cultural influences **Intimate**

Cottle,2003 In Beyond Self Esteem Thomas J Cottle argues that America s preoccupation with notions of self esteem and self regard not only does not reflect the fundamental nature of the self but leads to selfish behavior and an inability to devote one s self to friendships The self Cottle writes is predicated on social relationships and more specifically on the affirmation each of us offers to the other as well as the degree of responsibility we find ourselves willing to take for one another It is Cottle s contention reinforced by his theoretical positions and by the narrative accounts of children and adults alike that affirmation of and the assumption of responsibility for other people remain the most ethical human actions

Drawing Life Thomas J. Cottle,2013-11-21 In Drawing Life Thomas J

Cottle examines the ways people interpret their life experiences and construct meanings for the events they have encountered In this manner they discover their various identities and the essence of what we call the self In reading the sixteen life studies contained in this volume we encounter both inner reflections as well the power of culture to shape the meanings people give to their circumstances and the events that befall them The stories also reflect the role of human relationships and social institutions in defining our personal identities and sense of justice What makes us unique therefore is the personal story we tell as it reveals our constructions of the world and of ourselves The stories recounted in Drawing Life illuminate not only our past but also our perceptions of the present and our imaginings of the future In this way they become anthologies of our life experiences
