(Closed console type)

Removal

(1) Before removing any belt straps, attach a clip to the belt just above the reel assembly to prevent the belt retracting during removal and storage. The clip must not be removed until the belt assembly has been refitted.

(2) **Reel assembly—Brisac type.** To remove the mounting screw on two-door cars, withdraw most of the webbing from the reel, remove the screw at the side of the reel and rotate the locking nut (Fig. 0a.5). The two-door car's reel assembly is fixed directly onto the base of the door pillar and it is only necessary to withdraw the mounting screw and lock washer to detach the reel and distance piece.

On four-door cars the reel assembly is mounted on a bracket, the lower end of which is attached to the sill by the same screw which retains the lower belt bracket. To separate the reel assembly from the bracket, the bracket and reel must be removed as an assembly from the car (Fig. 0a.6).

Note that the reel assembly is fixed to the inner face of the bracket (Fig. 0a.6).

(3) **Reel assembly—Kangol type.** On two-door cars remove the screw and plain washer retaining the reel assembly to the base of the door pillar, and detach the assembly.

On four-door cars the reel assembly is mounted on a bracket with a screw, lock washer and nut. The bracket and reel must be removed as an assembly before the reel can be detached from the bracket. The bracket is retained to the sill at its lower end by the same fixing screw which retains the lower belt bracket (see Fig. 0a.7).

Note that the reel assembly is fixed to the outer face of the belt bracket (Fig. 0a.7).

(4) Remove the plastic cover from the door pillar facing on the Kangol type and slide back the plastic cover (Austin America only) from the sill facing on the Brisac-type belt.

Remove the screws retaining the belt brackets to the door pillar and sill. Note the order of assembly of the distance pieces and anti-rattle washers, and the individual lengths of the fixing screws.

Central console. Remove the nut and lock retaining the unit to its mounting straps and withdraw the unit. Note that a sleeve washer is fitted on either side of the Brisac-type console.

(5) Mounting brackets

(a) **Central console brackets.** Remove the capnut, and remove the hexagon screw, lock washer and self-capping screw retaining each strap to the front lateral (Fig. 0a.8).

(b) **Belt bracket (four-door cars).** The bracket is retained to the sill at its lower end by the same screw which anchors the belt bracket.

Refitting

(1) Reverse the order of the removing procedure, using the following:

(a) On the Brisac-type belt the shorter screw and the thinner double-sided distance piece must be used to attach the belt bracket to the mounting point at the base of the door pillar.

(b) The Kangol-type reel must be mounted with the top flat surface of the locking nut horizontal in BOTH planes. Tighten the locking nut retaining screw to a torque tightness of 2 lb. in. (28 kg.cm).

(c) The top surface of the Kangol-type reel must be horizontal and the screw at the side of the reel must point vertically. To adjust the screw position, slacken the screw adjacent to the screw, and turn the screw until it is in the correct position. Retighten the screw.

(d) The reel assembly, belt brackets and central console must be refitted with the component parts in the correct order as shown in Fig. 0a.4, 0a.5, 0a.6 and 0a.7.
