*Bully, Victim, or Hero: How to Assert Yourself without being a Target for Bullying or Violence.* Ray Amanat, 2013-09-17  
Have you ever watched someone being bullied or have you ever been the target of bullying yourself? Our usual response to bullying is to fight back, run away, or ignore it and try to be the better person while the bully has their way. But what if you knew of another alternative? One that didn't invite more aggression, one that puts you in control of the situation so that you do not lose face in front of peers, one that helps you diffuse or even handle the bully outright while you stand your ground. In this book, you are going to learn: How not to think or react like a victim; How to stand up for yourself if you are an intended target of bullying or violence; How to stand up for others as the bystander; How to break the cycle of self-sabotage that causes aggressive behavior or bullying. If you have children in school, If you are a teacher, school administrator, or someone that plays a role in the life of a child. If you have ever felt hopeless and out of options. If you want to know how to be assertive without being violent, this book is definitely for you. Put control back into your life. Learn to be an assertive, effective Hero.

*Visual Friendlies, Tally Target: How Close Air Support in the War on Terror Changed the Way America Made War* Ethan Brown, 2024-11-30  
Brown has taken an incredibly complex subject and made it accessible and readable all while retaining the gravity of history and the sheer intensity of these battlefields. Airpower became a fundamental warfighting tool in the Global War on Terror and its success depended on the community of JTACs whose experiences populate this important work. They are the unsung heroes of the post 9/11 wars. America needs to meet David L Goldfein General Ret USAF 21st Chief of Staff. With a new century and a new enemy came a new kind of war: low intensity and civilian dominated, blending austere rural and dense urban environments alike. Into this new kind of war, the American military launched two invasions against terrorist networks and military rivals, relying on airpower, close air support (CAS) at a scale never before seen in combat. The Global War on Terror was the CAS war. Forward Air Controllers were on the front lines from the very first moments of the war, directing airstrikes against enemies in their safe havens, safeguarding friendly forces and civilians alike to their utmost and achieving unprecedented success with limited resources. This volume captures the heroic accounts of the first Tactical Air Control Party (TACPs) in Afghanistan and Iraq and how Close Air Support fundamentally reshaped the American war machine in the first five years of the War on Terror.

**How to Stay Smart in a Smart World** Gerd Gigerenzer, 2022-08-02  
How to stay in charge in a world populated by algorithms that beat us in chess, find us romantic partners, and tell us to turn right in 500 yards. Doomsday prophets of technology predict that robots will take over the world, leaving humans behind in the dust. Tech industry boosters think replacing people with software might make the world a better place while tech industry critics warn darkly about surveillance capitalism. Despite their differing views of the future, they all seem to agree: machines will soon do everything better than humans. In *How to Stay Smart in a Smart World*, Gerd Gigerenzer shows why that's not true and tells us how we can stay in charge in a world populated by algorithms. Machines powered by artificial intelligence are good at

some things playing chess but not others life and death decisions or anything involving uncertainty Gigerenzer explains why algorithms often fail at finding us romantic partners love is not chess why self driving cars fall prey to the Russian Tank Fallacy and how judges and police rely increasingly on nontransparent black box algorithms to predict whether a criminal defendant will reoffend or show up in court He invokes Black Mirror considers the privacy paradox people want privacy but give their data away and explains that social media get us hooked by programming intermittent reinforcement in the form of the like button We shouldn't trust smart technology unconditionally Gigerenzer tells us but we shouldn't fear it unthinkingly either
