Tesla Model Temu Top:

The New Geography of Innovation Mehran Gul, 2026-01-20 A groundbreaking exploration of the shifting landscape of technological innovation and how it has transformed into a global phenomenon challenging the traditional dominance of Silicon Valley. The US is the source of just about all the technologies that define modern life: personal computers, operating systems, smartphones, e-commerce, web browsers, email, search engines, social networks, electric cars, and the rest. And most of the tech companies that created and monetized these technologies are also in the US. In this book, Mehran Gul, the winner of the Financial Times McKinsey Bracken Bower Prize, asks: is that changing? Less than a decade ago, the sentiment towards Chinese tech companies was often dismissive and complacent. Now the alarm bells are ringing. But as the commentariat pontificates how the US-China tech battle will play out, an equally interesting question to ask is: are there more Chinas out there? Samsung, a South Korean conglomerate, competes with Apple to be the world's largest manufacturer of smartphones. ARM, founded in the UK, develops chip designs that are used in more than 90% of all mobile devices. Spotify, based in Sweden, is the most popular music streaming service in the world. That's not all. The world's most important semiconductor company, TSMC, is in Taiwan. The other most important company in the semiconductor industry, ASML, is in the Netherlands. Some of the world's best-known games, like Minecraft, Candy Crush, and Angry Birds, came from gaming studios in the Nordics. Nearly all the major electric battery manufacturers, like CATL, LG, and SK On, are in Asia. This is a story about technology and the places where it finds its way into the world. Silicon Valley has, for half a century, been unrivalled in spinning out technologies and fast-growing, high-value, billion-dollar-plus tech companies: the Apples, Facebooks, Googles of the world that made it the center for the most rapid creation of wealth in human history. Its secrets are spreading to more places. The geography of innovation is shifting. The world has a lot more high-value tech companies than ever before, growing a lot faster than ever before, in a lot more places than ever before. This is a book about these places. *Sekrety Applea.
