Edward Niedermeyer, 2019-08-20 Tesla is the most exciting car company in a generation but can it live up to the hype Tesla Motors and CEO Elon Musk have become household names shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom The company's market valuation now rivals that of long established automakers and to many industry observers Tesla is defining the future of the industry But behind the hype Tesla has some serious deficiencies that raise questions about its sky high valuation and even its ultimate survival Tesla's commitment to innovation has led it to reject the careful zero defects approach of other car manufacturers even as it struggles to mass produce cars reliably and with minimal defects While most car manufacturers struggle with the razor thin margins of mid priced sedans Tesla's strategy requires that the Model 3 finally bring it to profitability even as the high priced Roadster and Model S both lost money And Tesla's approach of continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans In Ludicrous journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces Blending original reporting and never before published insider accounts with savvy industry analysis Niedermeyer tells the story of Tesla as it's never been told before with clear eyes objectivity and insight *Marketing Case Study Tesla* Ricardo Escoda, 2018-05-18 Case Study from the year 2018 in the subject Business economics Offline Marketing and Online Marketing grade 1 3 International School of Management Campus Munich language English abstract As the number of publications referring to Tesla increased formidable during the last years it is a highly discussed automotive brand which is becoming more and more important In August 2017 the Bernstein Research Institute published a study dealing with brand enjoyment and service experiences of 286 Tesla owners which resulted in a fanatical brand loyalty autonomous of the region the participants lived in This paper deals with aspects of Global Marketing Management and Customer Relationship Management which on the one hand include growth drivers and complexities that underpin the strategy of Tesla in its quest to exercise market power in a very competitive automotive market place and on the other hand examine how Tesla was able to connect its customers as
