*Peste des Petits Ruminants Virus* Muhammad Munir, Muhammad Abubakar, 2025-05-11 This book subtly presents the Peste des Petits Ruminants Virus PPRV a morbillivirus closely related to rinderpest virus that decimates sheep and goats along with those of other susceptible domestic ruminants and many wildlife species Following its first introduction to the West Africa in 1940 PPRV was rapidly disseminated across sub Saharan Africa the Middle East and Southern Asia Recent outbreaks of PPR in Morocco and European part of Turkey are posing continuous threats to many European countries This book focuses on the key dynamics of this deadly disease and incorporates considerable historical detail infection biology comparative molecular biology and pathophysiology of the disease The accurate disease diagnosis management and prevention of the disease are crucial for clinicians Thus three chapters emphasize the traditional prophylactic measures clinical outcome of the disease and clinical disease assessments The genomic organization and molecular biology of PPRV is described comprehensively Because of the current sensitivity about an emergence of PPRV and successful Global Rinderpest Eradication Programme finally a chapter is dedicated to explore the possibilities to control and eradicate the PPRV from the globe the way similar to rinderpest virus Collectively this book consists of high quality scientific and historical research contributed by the top experts in the field from all around the globe Moreover editor's vast experience with PPRV and collaborations with other researchers worldwide make this book unique This book offers a valuable reference source for virologists field veterinarians infection and molecular biologists immunologists scientists in related fields and veterinary school libraries

**Blaming Mothers** Linda C. Fentiman, 2019-05-01 A gripping explanation of the biases that lead to the blaming of pregnant women and mothers Are mothers truly a danger to their children's health In 2004 a mentally disabled young woman in Utah was charged by prosecutors with murder after she declined to have a Caesarian section and subsequently delivered a stillborn child In 2010 a pregnant woman who attempted suicide when the baby's father abandoned her was charged with murder and attempted feticide after the daughter she delivered prematurely died These are just two of the many cases that portray mothers as the major source of health risk for their children The American legal system is deeply shaped by unconscious risk perception that distorts core legal principles to punish mothers who fail to protect their children In *Blaming Mothers* Professor Fentiman explores how mothers became legal targets She explains the psychological processes we use to confront tragic events and the unconscious race class and gender biases that affect our perceptions and influence the decisions of prosecutors judges and jurors Fentiman examines legal actions taken against pregnant women in the name of fetal protection including court ordered C sections and maintaining brain dead pregnant women on life support to gestate a fetus as well as charges brought against mothers who fail to protect their children from an abusive male partner She considers the claims of physicians and policymakers that refusing to breastfeed is risky to children's health And she explores the legal treatment of lead poisoned

children in which landlords and lead paint manufacturers are not held responsible for exposing children to high levels of lead while mothers are blamed for their children's injuries Blaming Mothers is a powerful call to reexamine who and what we consider risky to children's health Fentiman offers an important framework for evaluating childhood risk that rather than scapegoating mothers provides concrete solutions that promote the health of all of America's children Read a piece by Linda Fentiman on shaming and blaming mothers under the law on The Gender Policy Report
