<b>5</b>	<b>1.5 miles</b> 30 minutes moderate pace	<b>4 miles</b> 74 minutes 40 min mod + 3.4 min fast					

## Tips To Follow The 30-Day Walking Plan

1. Slow is a stroll - approx 25 minutes/mile. Use this easy pace to warm up.
2. Moderate is a normal walking pace - 20 minutes/mile. You can still talk as you walk.
3. Fast is walking at a brisk pace where you're pushing yourself - 1.7 minutes/mile.
4. Complete sessions in one go or split into 2.
5. Repeat a week if you find it too hard.
6. If the plan is too easy increase the intensity of your walks with intervals or hills.

**Or, Popular Program** Henry Davenport Northrop,1899     Bowker's Complete Video Directory, 1998 ,1998     Walk-in Area Atlas ,1995     *Connecting the Dots in Physiotherapy: Reframing the Role of the Profession in the Anthropocene* Berta Paz-Lourido,Filip Maric,2025-10-24

For many decades physiotherapy services were characterized by rehabilitative care carried out primarily in hospitals and rehabilitation centers Despite clinical educational and research advances in many parts of the world the imagination of policymakers and administrators in health services remains irremediably linked to large rooms with dozens of stretchers and rehabilitation equipment From those black and white photographs that are part of the honorable past of the profession where physiotherapy played and still plays a crucial role in caring for victims of wars or those with consequences of polio the discipline has moved on to a painting of a multitude of colors Looking toward the future in the Anthropocene requires more than ever to delve into the roots of the etymology of the term physiotherapy much more linked to interventions connected to nature than to closed clinical spaces as much related to health promotion and early intervention as to tertiary conservative and contributory procedures The use of physical agents in their curative preventive and palliative facets is much broader in physiotherapy than in other health disciplines But it is also crucial in public health in the co design of healthy environments in health promotion in schools or in global health interventions to mention just a few Despite all this research practice and innovative education in this area is often invisible and studies that support this breadth are still scarce The current challenges posed by planetary and human health require an alternative vision of health care more

linked to healthy environments home neighborhood educational institutions workplace leisure spaces etc and a perspective of health interventions as more integrated with society and the environment The role of physiotherapy in this open space enjoys a growing and strong interest anchored in part as a response to the reductionism that a relevant part of clinical research grants to physiotherapy increased with the massive inclusion of technology as a therapeutic and educational mediator Incorporating planetary and population health as well as social and ecological perspectives into physiotherapy pedagogy would facilitate community engagement and sustainability in the field This open approach to physiotherapy allows not only to transform people's lives but also to bring the seemingly distant premises of planetary health to local action It is now urgently necessary to bring scientific research in this area to the surface open new debates and create spaces for future studies based on a more systemic relational and questioning conceptions of the discipline and its eco social role and responsibilities This Research Topic aims to highlight the role of physiotherapy in nature based health promotion interventions in public health initiatives global health and planetary health approaches and many more We will accept all methodologies and study designs including theoretical perspectives To contribute towards the development of this broad scope of physiotherapy this Research Topic calls for submissions on physiotherapy linked to Natural based interventions and health promotion Planetary health from a global local and local global perspective Global health ethics climate justice and human rights Environmental physiotherapy in all its approaches Urban planning and design green and blue cities zones co participation governance and public policies Healthy environments of all types from broad approaches such as healthy cities to other areas such as healthy schools universities workplaces leisure places Use of raw materials in physiotherapy sustainability and eco friendly strategies outdoors natural spaces and environmentally responsible interventions Community participation resilience climate change and health promotion Service learning and community engagement innovative approaches in physiotherapy education We would like to send thanks to the following organizations who are in support of this Research Topic and the articles published iApS 2030 Environmental Physiotherapy Association and European Network of Physiotherapy in Higher Education
