with the code review

First, let's look at the changes made to the scripts:

- The start script was changed from "node -r dotenv/config ./dist/lib/index.js" to "node -r dotenv/config ./dist/index.js". This change appears to be correct as it looks like the index file has been moved from the lib folder to the root dist folder.
- The build script was changed from "rm -rf dist && rollup -c rollup.config.ts --configPlugin @rollup/plugin-typescript", which appears to be correct as it removes the previous build and creates a new one with the updated config.
- Lastly, the deploy script was removed, which appears to be correct as it is no longer needed.

Overall, the changes appear to be valid and should not cause any problems.
