Ipad Phonics Practice Deal:

TPACK: Breakthroughs in Research and Practice Management Association, Information Resources, 2019-02-01
Educational technologies are becoming commonplace entities in classrooms as they provide more options and support for teachers and students. However, many teachers are finding these technologies difficult to use due to a lack of training and instruction on how to effectively apply them to the classroom. **TPACK Breakthroughs in Research and Practice** is an authoritative reference source for the latest research on the integration of technological knowledge, pedagogical knowledge, and content knowledge in the contexts of K-12 education. Highlighting a range of pertinent topics such as pedagogical strategies, blended learning, and technology integration, this publication is an ideal resource for educators, instructional designers, administrators, academicians, and teacher education programs seeking current findings on the implementation of technology in instructional design.

Practice Methodologies in Education Research Julianne Lynch, Julie Rowlands, Trevor Gale, Stephen Parker, 2019-10-08 **Practice Methodologies in Education Research** offers a fresh approach to researching practice in education. Addressing a major gap in research methodology scholarship, it highlights how integral practice theory is to the transformational agendas of education research, introducing a theory of activist practice methodologies informed by expansive theories of practice. With contributions from leading education researchers drawn from across the world, the book confronts onto epistemological dilemmas for doing research that arise from taking practice theory seriously, including the theories of Bourdieu, de Certeau, Deleuze, Haraway, Latour, Taylor, and Vygotsky. A defining feature of the chapters is their activist axiologies and their experimental approach to researching practice in education in fields as diverse as educational leadership, schooling, higher education, adult and workplace education and training, professional practice, and informal learning. **Practice Methodologies in Education** is essential reading for education academics and postgraduates engaged in critical research using practice theory.

Literacy Instruction for Students with Emotional and Behavioral Disorders Richard T. Boon, Mack D. Burke, Lisa Bowman-Perrott, 2020-08-10 This book provides educators with research-based interventions to improve literacy skills for K-12 students with emotional and behavioral disorders (EBD). It describes effective interventions, offers implementation guidance, and discusses technology-based instruction for diverse learners and alternative educational settings.

Advising Preservice Teachers Through Narratives From Students With Disabilities Cassidy, Kimberly Dianne, Sande, Beverly, 2021-10-22 The lives of students with disabilities need to be told in ways that inform preservice teachers about the work involved to legally and morally meet the needs of these students. Hearing the positive and negative experiences of students with disabilities from elementary through college can inform preservice teachers as well as potentially prevent them from repeating some of the same mistakes. The richness of the personal stories of these students and how their experiences can shape the future for students like them offers teachable moments for professors and preservice teachers to use in classrooms. **Advising Preservice Teachers Through Narratives From**

Students With Disabilities heralds the stories of students with disabilities as they trace their journey from the PK 12 setting into university and adult life and addresses aspects that any new teacher must know in order to meet the needs of today's PK 12 classrooms. Covering topics such as social justice, virtual learning, and faculty convenience, it is ideal for preservice teachers, practicing teachers, administrators, professors, researchers, academicians, and students.

Teaching Science and Technology in the Early Years (3-7) Dan Davies, Alan Howe, Christopher Collier, Rebecca Digby, Sarah Earle, Kendra McMahon, 2019-04-30

Teaching Science and Technology in the Early Years 3-7 celebrates young children's amazing capabilities as scientists, designers, and technologists. Research-based yet practical and accessible, it demonstrates how scientific designing and making activities are natural to young children and have the potential for contributing to all aspects of their learning. By identifying the scientific and technological concepts, skills, and activities being developed, the book enables the reader to make more focused diagnostic observations of young children and plan for how they can help move them forward in their learning. This third edition has been thoroughly updated and features fresh insights into young children's learning from neuroscience and new materialist perspectives, a UK wide perspective on Early Years curricula, and how they support the inclusion of science and technology as an entitlement for young children. New case studies of successful evidence-based Early Years practice alongside new examples of practical planning for learning and advice on documenting children's learning stories, an updated chapter on assessing and documenting children's learning drawing upon findings from the Teacher Assessment in Primary Science TAPS project at Bath Spa University. Based on the latest research and first-hand experience, this practical and accessible book is essential reading for Early Years and Primary students on undergraduate PGCE and Masters level courses.
