ANSWERS INCLUDED

Cells and Microorganisms Study Guide

The purpose of this study guide is to help you understand the key concepts of cells and microorganisms. It is designed to be used as a reference tool for your studies.

1.1 – Living things consist of cells

Living things are made of cells. Cells are the basic units of life. They are the smallest units of an organism that can carry out all the processes of life.

1.2 – Two major types of cells

There are two major types of cells: prokaryotic and eukaryotic. Prokaryotic cells are simple cells that lack a nucleus. Eukaryotic cells are more complex cells that have a nucleus.

1.3 – Cell Division

Cells divide to produce new cells. This process is called cell division. There are two types of cell division: mitosis and meiosis. Mitosis is the process of a cell dividing into two identical daughter cells. Meiosis is the process of a cell dividing into four non-identical daughter cells.

Cells and Microorganisms Study Guide

Study Guide and Workbook to Accompany Zimbardo and Weber's Psychology, Second Edition Peter C.

Gram, Philip G. Zimbardo, 1997 Psychology Third Edition builds upon the experience and reputations of Phil Zimbardo and Ann Weber with the addition of a new co author Bob Johnson who has a wealth of teaching experience at the community college level This briefer less expensive book presents psychology in a meaningful manageable format that focuses on the key questions and core concepts of psychology Introductory psychology covers such a wide range of topics and issues that it becomes difficult for readers to see the forest for the trees To make key psychological concepts more meaningful the authors found inspiration in a classic chess study This study showed that experts did no better than novices at remembering the location of pieces on a chess board when they were placed randomly Only when the patterns represented actual game situations did they make sense and therefore become more easily memorable for the experts Clearly meaningful patterns are easier to remember and understand than random arrangements and Psychology applies this by presenting the field of psychology in meaningful patterns to enhance comprehension These concepts are then applied to readers own lives study skills and the world around them Finally Psychology integrates a cross cultural and multicultural perspective to make psychology meaningful for everyone For anyone interested in Introductory Psychology
