

A photograph of three middle school students sitting at a table, smiling and working on a project. The student on the left is a girl with dark hair wearing a yellow shirt. The student in the middle is a boy with light brown hair wearing a red shirt. The student on the right is a girl with long brown hair wearing a pink shirt. They are all looking towards the camera. On the table in front of them are various items including a green folder, a white notebook, and a yellow pencil. The background is a blurred classroom setting with a white ceiling and a window.

each activity is integrated within the text and designed to help develop students conceptual understanding of mathematics  
Mathematics in Literature offers thoroughly developed ideas for using children s literature to create meaningful contexts for  
mathematics learning An extensive bibliography that can be used for this purpose appears on the CD Rom I think the text is  
an excellent resource for elementary and middle school methods courses In particular I like how the textbook handles the  
bigger issues such as geometric reasoning rather than just geometry I also like the excellent foundation in educational  
research that the textbook provides as well as some very careful attention and consistent referencing to the NCTM standards  
and principles The incorporation of classroom vignettes teacher illustrations and samples of student work also all add to the  
excellent grounding of the text in real world classroom work Dr Neal Grandgenett University of Nebraska at Omaha
