**Policy and Procedural Guidelines for Hyperbaric Facilities** Laura Josefson, 2017-06-29 The field of hyperbaric medicine along with hyperbaric centers throughout the United States and abroad continues to grow. This growth has been exponential, touting an increase from 350 centers in 1993 to well over 2,500 programs today. With this progression exists a need to establish a resource guideline for developing complete and comprehensive policies and procedures for clinical hyperbaric units. Hyperbaric policy and procedures provide the guiding principles and foundation for safety, quality, transparency, and cost effective hyperbaric medical and nursing practice. Every hyperbaric facility needs to follow its specific policies and procedures. *Policy and Procedural Guidelines for Hyperbaric Facilities* provides needed resource and reference guidelines for new and established hyperbaric facilities. It will serve as a reference for the development of new hyperbaric policies as well as customize and enhance current policies and procedures already in place. *Policy and Procedural Guidelines for Hyperbaric Facilities* addresses issues of safety and practice for both the multiplace and monoplace environments. It utilizes regulatory guidelines and standards of practice as its foundation. Topics covered in this work include but are not limited to governance, administration, emergency procedures, patient care, hyperbaric chamber maintenance, treatment protocols, and quality improvement. The appendices include sample forms for both Class A multiplace and Class B monoplace chambers. They are intended to serve as templates for development of hyperbaric unit specific forms. Also included are acronyms, references, and an index all specific to hyperbaric medicine. The guidelines provided in this document will benefit the diverse group of physicians, nurses, technicians, and allied health care personnel in the hyperbaric field as they customize their unit specific policies and procedures. The contributing authors are comprised of established experts in the field of undersea and hyperbaric medicine. They are a diverse group of physicians, nurses, and technologists who devoted an extensive amount of time and energy into producing this resource document of the highest quality. Specific acknowledgements can be found in the List of Contributors section of the book. *Endorsement from Baromedical Nurses Association* BNA The Baromedical Nurses Association, established 1985, provides a forum for hyperbaric nursing that encompasses quality, safety, teamwork, mentoring, research, education, and nursing guidelines of standards of care for the patient receiving hyperbaric oxygen therapy. The Baromedical Nurses Association endorses the *Policy and Procedural Guidelines for Hyperbaric Facilities* as guidelines to enable hyperbaric facilities to develop and/or endorse their unit specific policies.

During the last decade the Undersea and Hyperbaric Medical Society UHMS has witnessed an extraordinary growth of interest and activity in the field of hyperbaric medicine. This is due in part to the important progress made in defining the mechanisms of action of hyperbaric oxygen therapy and to a growing awareness of its place in the medical treatment of various aspects of hypoxic related illnesses. An increasing awareness of the significance of problems facing patients suffering from chronic and non healing wounds in our aging society and the opportunity to improve patient outcomes has further stimulated the growth of this specialty. As with rapid growth in other specialties the need exists for basic recommendations to guide practitioners on issues such as training responsibility staffing credentialing safety and quality assurance. These recommendations are designed to help improve medical care, optimize outcomes, maintain safety and positively affect the lives of our patients. This edition of the UHMS Guidelines for Hyperbaric Facility Operation is not intended to be inclusive to rewrite authoritative texts or to usurp accepted organizations or certifying bodies but often references these standards when appropriate. For example in 2002 the UHMS established a voluntary clinical hyperbaric facility accreditation program. Recommendations contained in this report have been referenced as key survey elements of the accreditation process. As is the case with the practice of any medical specialty responsibility to ensure competency, quality of care and safety falls to the providers of that care and the institutions that support their practice. By providing these recommendations the UHMS hopes to stimulate and support the continued evolution of the safe and effective practice of this specialty.
