Mind Hacking Kyle Faber,2018-11-07 What exactly is mind hacking Mind hacking is about getting your mind to do things your mind doesn t know it can do or isn t doing things that you want it to do The mind is extremely powerful but it has no direction and that s where you come into play You need to give your mind its direction and when it doesn t give you what you want that is when you might hack it to work around its natural design and limitations That is what hacking your mind is about getting that infinitely powerful mind of yours to do something you want it to do even when it isn t complying or doesn t understand Very few people get full access and control of their mind and discover what it s truly capable of Think about what has been achieved when the mind has been used at full capacity It s been used to invent light bulbs printing presses computers phones and even harness the power of the sun Think about that Someone s mind once thought I can feel the heat from the sun so there has to be energy there I think I can harness that energy to produce electricity that humans can use How far fetched did that sound the first time someone heard it But now we have solar power Imagine if you could harness that kind of mind power and use it for yourself Imagine if you could unlock every corner of your brain and use it to its full potential What could
