**Resources Abstracts**, 1974 *The Routledge International Handbook of Ethnographic Film and Video* Phillip

Vannini, 2025-12-29 The Routledge International Handbook of Ethnographic Film and Video is a state of the art book that encompasses the breadth and depth of the field of ethnographic film and video based research With more and more researchers turning to film and video as key elements of their projects and as research video production becomes more practical due to technological advances as well as the growing acceptance of video in everyday life this critical book supports a broad and growing audience Readers looking to develop the skills necessary to produce meaningful ethnographic films and videos will find this book to be a comprehensive resource that will help them better understand and appreciate the unique ways in which film and video can serve as ways of knowing and as tools of knowledge mobilization The second edition introduces 18 new chapters continuing the book's overall mission of collecting original writings by the world's leading experts in their respective fields and subfields while approximately half of the first edition chapters have been fully updated with coverage of newer references and more contemporary examples and issues The contributors synthesize existing literature introduce the historical and conceptual dimensions of the field illustrate innovative methodologies and techniques survey traditional and new technologies reflect on ethics and moral imperatives outline ways to work with people objects and tools and shape the future agenda of the field The Handbook provides both a comprehensive introduction and up to date survey of the field for a vast variety of audiovisual researchers such as scholars and students in sociology anthropology geography communication and media studies education cultural studies film studies visual arts and related social science and humanities It will appeal to a multidisciplinary and international audience and features a dynamic forward thinking innovative and contemporary focus oriented toward the very latest developments in the field as well as future possibilities

**Why and How is the self related to the brain midline regions?** Georg Northoff, Niall W Duncan, Pengmin

Qin, 2014-09-26 What the self is and where it comes from has been one of the great problems of philosophy for thousands of years As science and medicine have progressed this question has moved to also become a central one in psychology psychiatry and neuroscience The advent of in vivo brain imaging has now allowed the scientific investigation of the self to progress further than ever Many such imaging studies have indicated that brain structures along the cortical midline are particularly closely related to self specific processing This association between cortical midline structures CMS and self is reinforced by the involvement of these regions in other self oriented processes such as mind wandering or stimulus valuation

Those midline regions involved in self processing also overlap with another network the default mode network which shows high brain activity during the so called resting state indicating that there may be a special relationship between self processing and intrinsic activity Although such promising groundwork linking the self and CMS has been carried out many questions remain These include what features of the midline regions lead to their apparent importance in self processing How can we appropriately account for confounding factors such as familiarity or task effects in our experiments How is the self related to other features of the mind such as consciousness How is our methodology influencing our attempts to link the self and the brain The purpose of this ebook is to address some of these questions including opinions perspectives and hypotheses about the concept of the self the relationship between CMS and the self and the specific function of these brain regions in self processing It also includes original research papers describing EEG fMRI and behavioral experiments investigating different aspects of the self [Machine Language for Beginners](#) Richard Mansfield,1983 Introduces the Beginner to Machine Code Includes Utilities An Assembler a Disassembler [Whitaker's Cumulative Book List](#) ,1966

**from Latin America** Camilo Hurtado-Parrado,Carlos Gantiva,Leonardo A. Ortega,Alexander Gómez-A,Lucas Cuenya,Javier Leonardo Rico,2020-05-11 Latin America has increased its share of world scientific publications by nearly twofold during the last two decades approximately from 2 to 4% Despite this positive trend the scholarly impact of scientific research produced in the region measured in terms of citation rate remains low Two interrelated factors that contribute to this situation is that most research groups tend to work in isolation or in local sporadic collaboration and results are often published in journals that are not indexed in major citation databases e g SCOPUS or Web of Science Ultimately part of Latin American high quality research seems to remain hidden from the rest of the world Over the last decades an important number of Latin American scientists have developed fruitful research agendas on questions on learning and emotion focusing on basic and or translational research with humans and other animal models and implementing diverse methodologies Notwithstanding the important contributions of these research programs Latin American research on emotion and learning has followed the overall trend of other research fields throughout the region namely remaining partially hidden from the large scientific community of the world This Research Topic aimed to engage researchers from Latin America to share their empirical and conceptual work on learning and emotion Ultimately this effort was expected to strengthen and integrate our regional community of experts enhance global networking and establish new challenges and developments for future investigation

[Novel Insights Into a Functional HIV Cure](#) Taisuke Izumi,Cristina Parolin,Luca Sardo,Alfredo Garzino-Demo,Takeshi Yoshida,2022-01-17 [Experiments in Practice](#) Astrid Schwarz,2015-10-06 Traditionally experimentation has been understood as an activity performed within the laboratory but in the twenty first century this view is being challenged

Schwarz uses ecological and environmental case studies to show how scientific experiments can transcend the laboratory
