As if life comes full circle in the 21st century private businesses and the ubiquity of social networks such as Facebook, Google, Twitter, and YouTube are creating the technologies and infrastructures necessary for the DARPA proposed Total Information Awareness program. WikiLeaks founder Julian Assange called Facebook the most appalling spying machine that has ever been invented. Indeed military and civilian technologies have interwoven into every fabric of our society as Facebook co-founder and CEO Mark Zuckerberg said. We exist at the intersection of technology and social issues. This book offers discourse and practical advice on the privacy issue in the age of big data, the rise of Facebook nation and Total Information Awareness. Opening with President Ronald Reagan's 1984 National Security Decision Directive and ending with George Orwell's novel 1984, the author takes us on a roller coaster ride through Facebook's botched IPO, Carrier IQ, Kony 2012, SOPA, PIPA, blackout, cyber bullying, crime fighting and a host of other timely issues facing our Facebook nation. Social media strategists, information architects, social scientists, policymakers and academic scholars in the Program in Science Technology and Society STS will find this book a valuable asset.
