**Apple Music** Steve Markelo, 2015-07-29 The Apple Music is a new music streaming playing service that has been introduced by Apple Inc. The service allows the Apple users to be able to choose the music they would like to hear on demand. When users sign up for this service they will get a combination of the Beats 1 radio station and the Connect blog for artists to share information with their fans. The service also allows the users to get recommendations based on their taste and it can be integrated with the popular Siri command service. The complete service is similar to other streaming services however it is different based on the additional features offered and exclusive content. It aims to stand out by not using computer algorithms to determine the tastes of user but by using the human element to build more precise catalogs. The added exclusive content will provide a direct link to the artists in which fans can get content that is unfiltered and unedited. They can make comments and see the direct inspiration of the artists.

your Apple devices Befuddled by Apple Music Confused about whether or how to sync your media to the cloud Wondering

how to view movies and TV shows on each of your devices. Wishing for a way to organize your podcasts? In this book Kirk McElhearn explains not only how Apple's media apps work but also how normal people can make the Music, TV, Podcasts and Books apps do just what they want. Back in 2019, Apple replaced iTunes for Mac, iOS and iPadOS with three apps: Music, TV and Podcasts. With audiobooks handled by the Books app, Take Control of Apple Media Apps is your guide to this post-iTunes world. Covers macOS 15, Sequoia, iOS 18 and iPadOS 18 or later, including macOS 26, Tahoe, iOS 26 and iPadOS 26, plus Apple Watch, Apple TV and HomePod. Expanding on his earlier title Take Control of macOS Media Apps, Kirk McElhearn shows you how to manage your music, videos, podcasts and audiobooks on all your Apple devices. Whether you just want to play your media or you want to go deeper with special features like Apple Music Genius, Shuffle, Playing Next and iTunes Match, this comprehensive guide has the answers you need. Kirk also looks at various ways of bringing audio and video into Apple's media apps, tagging music and videos so you can find them more easily later, creating playlists, sharing your library over a home network and accessing your media libraries on your iPhone, iPad, Apple Watch, Apple TV or HomePod. Here's just a taste of what the book covers:

- Music: Play Music. Learn the basics of playing audio and even music videos in the Music app. You'll also learn about making quick playlists with Genius and Playing Next, the best ways to search for the music you want to hear, how to stream music to other devices in your home and how to view lyrics while tunes play.
- Stream Music: Use Apple Music, a paid service to listen to any of 100 million tracks. Or listen to live broadcasts from Apple Music Radio, including Apple Music 1, Apple Music Hits, Apple Music Country and other live radio stations.
- View Your Music: Learn how to view your music library and work with contextual menus in the Music app.
- Organize Your Music: Make a simple playlist of romantic songs, workout songs or whatever theme you like. You'll learn how to create smart playlists that, for example, comprise only your 5-star faves or only tunes you haven't heard recently, and how to transfer playlists to your Apple Watch.
- Store Your Music Library in the Cloud: What are the pros and cons of using the Sync Library setting to store your music in the cloud? How do Music and iTunes Match figure out whether to upload your music when that setting is enabled? How can I make sure I have all the media I want on each of my Apple devices?
- Get answers to these questions and more:
- Tag Your Music: Tags are bits of information also known as metadata that can describe your media. Learn which tags to bother changing, the best ways to add lyrics and album art, how to rate songs with stars, favorites or both, and what other types of metadata you can use.
- Meet Apple Music Classical: Apple Music Classical is a special app for iPhone that helps lovers of classical music enjoy their favorite composers, performers and pieces without the limitations of the standard Music app.
- View Movies and TV Shows: Use the TV app to watch videos, including those purchased, rented or streamed from Apple, and those you add yourself.
