The New Deal

Reading Comprehension

Read the passage and answer the questions.

The Great Depression was a severe economic downturn that began in 1929 and lasted until the mid-1930s. It was characterized by widespread unemployment, poverty, and a collapse in consumer spending.

The New Deal was a series of programs and policies implemented by President Franklin D. Roosevelt to provide relief, recovery, and reform during the Great Depression.

One of the main goals of the New Deal was to provide immediate relief to the unemployed and the poor. This was achieved through programs like the Civil Works Administration (CWA) and the Federal Emergency Relief Administration (FERA).

Another goal was to stimulate economic recovery by creating jobs and increasing demand. This was done through programs like the Public Works Administration (PWA) and the National Industrial Recovery Act (NIRA).

Finally, the New Deal aimed to implement long-term reforms to prevent a future depression. This included the Social Security Act, which established a system of social insurance, and the Federal Reserve Act, which gave the Federal Reserve more power to regulate the money supply.

The New Deal was a landmark moment in American history, as it marked the first time the federal government took such a direct role in the economy. It also laid the foundation for the modern welfare state.

While the New Deal did not end the Great Depression, it did provide much-needed relief and helped to stabilize the economy. It also paved the way for the economic growth of the post-war era.
